Scholarly Digital Editions as Interfaces Roman Bleier, Martina Bürgermeister, Helmut W. Klug, Frederike Neuber, Gerlinde Schneider, 2018-11-15 Interfaces are important elements of digital scholarly editions as they allow and direct the interaction of users with the online content and they facilitate the access to and exchange of data and information. Some interfaces are created for the human user GUI others for machine interaction and data exchange API. Both aspects of interfaces and their roles in digital scholarly editing were discussed at a conference in 2016 organised by the Centre for Information Modelling at the University of Graz and the Digital Scholarly Editions Initial Training Network DiXiT. This volume includes a range of papers presented at the conference that highlight the diverse views and approaches towards interfaces in the digital scholarly editing community.

The New Walford Guide to Reference Resources Ray Lester, 2005 The New Walford highlights the best resources to use when undertaking a search for accurate and relevant information saving you precious time and effort. For those looking for a selective and evaluative reference resource that really delivers on its promise look no further. In addition to print sources The New Walford naturally covers an extensive range of e reference sources such as digital databanks digital reference services electronic journal collections meta search engines networked information services open archives resource discovery services and websites of premier organizations in both the public and private sectors. But rather than supplying a list of all available known resources as a web search engine might The New Walford subject specialists have carefully selected and evaluated available resources to provide a definitive list of the most appropriate and useful. With an emphasis on quality and sustainability the subject specialists have been careful to assess the differing ways that information is framed and communicated in different subject areas. As a result the resource evaluations in each subject area are prefaced by an introductory overview of the structure of the relevant literature. This ensures that The New Walford is clear easy to use and intuitive.

Publisher *Electronic Book 2000* Victor McCrary, Linda McGee, Mary Floyd, 2000 *Reference Skills for the School Librarian* Ann Marlow Riedling Ph.D., Cynthia Houston, 2019-10-21 Designed for courses that prepare LIS students for school librarianship this title teaches basic reference processes sources services and skills and provides authentic school library reference scenarios and exercises.

This fourth edition of Reference Skills for the School Librarian Tools and Tips acknowledges the vital importance of reference skills in school libraries. It focuses on new reference skills for school librarians and includes more online materials such as Webliographies and a glossary. Teaching reference skills and providing reference services to students and staff in schools are extremely important tasks and are required of librarians on a regular basis. Aimed at pre-service and in-service school librarians, this book covers all types of reference materials including almanacs, dictionaries, encyclopedias, atlases, and other standard information sources, giving extra emphasis to the online sources to which students increasingly turn. This edition addresses more online reference resources than previous editions and offers practical suggestions for use in K-12 student instruction.

A Dictionary of Computer Science Andrew Butterfield, Gerard Ekembe Ngondi, Anne Kerr, 2016-01-28. Previously named A Dictionary of Computing, this bestselling dictionary has been renamed A Dictionary of Computer Science and fully revised by a team of computer specialists, making it the most up-to-date and authoritative guide to computing available. Containing over 6,500 entries and with expanded coverage of multimedia, computer applications, networking, and personal computer science, it is a comprehensive reference work encompassing all aspects of the subject and is as valuable for home and office users as it is indispensable for students of computer science. Terms are defined in a jargon-free and concise manner with helpful examples where relevant. The dictionary contains approximately 150 new entries, including cloud computing, cross-site scripting, iPad, semantic attack, smartphone, and virtual learning environment. Recommended web links for many entries, accessible via the Dictionary of Computer Science companion website, provide valuable further information, and the appendices include useful resources such as generic domain names, file extensions, and the Greek alphabet. This dictionary is suitable for anyone who uses computers and is ideal for students of computer science and the related fields of IT, maths, physics, media, communications, electronic engineering, and natural sciences.

Radical Cataloging K.R. Roberto, 2015-03-07. This collection of critical and scholarly essays addresses the state of cataloging in the world of librarianship. The contributors, including Sanford Berman, Thomas Mann, and numerous front-line library workers, address topics ranging from criticisms of the state of the profession and traditional Library of Congress cataloging to methods of making cataloging more inclusive and helpful to library users. Other essay topics include historical overviews of cataloging practices and the literature they generate, first-person discussions of library workers' experiences with cataloging or metadata work, and the implications behind what materials get cataloged, who catalogs them, and how. Several essays provide a critical overview of innovative cataloging practices and the ways that such practices have been successfully
