has established himself as one of America's youngest and brightest entrepreneurs Book jacket Dell Business Case Study  
Nihat Canak, 2006-11-28 Research Paper undergraduate from the year 2006 in the subject Business economics Offline  
Marketing and Online Marketing grade 10 Western Carolina University course Marketing Management Mature Consumers  
language English abstract Michael Dell founded Dell Computer in 1984 At the time he was only 19 years old and in his first  
year of studies at the University of Texas in Austin Michael Dell had a simple but powerful vision that personal computers  
could be built to order and sold directly to customers This followed from his belief that the PC made up of little more than  
software from Microsoft and chips from Intel was rapidly becoming a commodity product Dell's new approach to the PC  
business had two advantages 1 bypassing distributors and retail dealers reduced marketing and sales costs by eliminating  
the markups of resellers and 2 building to order greatly reduced the costs and risks associated with carrying large volumes of  
both and finished goods Michael Dell started his company with only US 1 000 of capital Dell Computer experienced its share  
of difficulties in the first few years to the point where some family members and friends wondered whether it had been wise  
for Michael to drop out of university Several times it had to refine its strategy even as it was implementing it The company  
started off by using the direct sales model for upgraded versions of IBM compatible PCs However within a year it was selling  
its own brands of PCs Most of Dell's customers in the 1980s were hobbyists and experienced PC consumers Not surprisingly  
Dell Computer was an early and enthusiastic convert to the Internet It gained a first mover advantage by setting up its first  
Web site in 1994 a year in which its total revenues were US 3.5 billion By 1998 its Internet sales accounted for more than  
half of the firm's total revenues which by then had surged to more than US 20 billion At that point Michael Dell had joined  
Bill Gates of Microsoft and Larry Ellison of Oracle among those who had become high technology billionaires after dropping  
out of university Michael Dell believes that his biggest challenge now is to have his company's direct business model as  
widely accepted outside the United States as it is across Dell's home market He sees a need for aggressive marketing  
activities to develop customer trust and some modification of the basic model to account for institutional weaknesses and  
cultural differences in places like China and India Michael Dell does not seem to be particularly concerned about the efforts  
of competitors to duplicate his build to order business model **The Best Business Books Ever** Basic Books, 2011-04-05
