customer to understand what worked and what did not work reliably in their FPGA design process I noted that this problem was not unique to this one customer The characteristics of the problem are shared by many Corporations that implement designs in FPGAs The Corporation has many design teams at different locations and the success of the FPGA projects vary between the teams There is a wide range of design experience across the teams There is no working process for sharing design blocks between engineering teams As I analyzed the data that I had received from hundreds of customer visits in the past I noticed that design reuse among engineering teams was a challenge I also noticed that many of the design teams at the same Companies and even within the same design team used different design methodologies Altera had recently solved this problem as part of its own FPGA design software and IP development process
