R. Martinez, Nancy Conrad Martinez, 2007 With an emphasis on inquiry and process Teaching Mathematics in Elementary and Middle School embraces active mathematics instruction and the development of mathematical thinking through problem solving The text challenges future teachers to prepare their K 8 students for a world that requires a higher level of mathematical literacy and enables them to compete in a global society Teachers will develop their own mathematical abilities allowing them to help students discover a rich combination of thinking processes and problem solving strategies raising the learning expectations for all Unique text features TIE Thought Investigation and Exploration features ask pre service teachers to develop their own thinking and learning abilities preparing them to better challenge their students Mathematics in the Real World Idea Files and Teacher Profiles model best practices and supply readers with concrete teaching tools and strategies Mathematical Thinking Mathematical Games and Mathematics and Technology features detail activities to engage and develop students mathematical thinking Accompanying student artifacts illustrate the progression of students conceptual understanding CD logo replaces bullet Math Activities CD ROM provides an outstanding text component containing more than 100 activities that use a three step process explore invent discover to foster the development of mathematical thinking through guided inquiry Aligned with the NCTM standards each activity is integrated within the text and designed to help develop students conceptual understanding of mathematics Mathematics in Literature offers thoroughly developed ideas for using children s literature to create meaningful contexts for mathematics learning An extensive bibliography that can be used for this purpose appears on the CD Rom I think the text is an excellent resource for elementary and middle school methods courses In particular I like how the textbook handles the bigger issues such as geometric reasoning rather than just geometry I also like the excellent foundation in educational research that the textbook provides as well as some very careful attention and consistent referencing to the NCTM standards and principles The incorporation of classroom vignettes teacher illustrations and samples of student work also all add to the excellent grounding of the text in real world classroom work Dr Neal Grandgenett University of Nebraska at Omaha Activities for Junior High School and Middle School Mathematics Kenneth E. Easterday, Loren L. Henry, F. Morgan Simpson, 1981 Activities are one means of connecting both the various strands of mathematics with one another and mathematics with other disciplines This compilation of articles from NCTM journals includes strands on problem solving reasoning number relationships statistics and more Teaching Children Mathematics, 2009-08 **Journal for Research in Mathematics Education**, 2000 **Teaching to Empower** Debbie Zacarian, Michael Silverstone, 2020-03-16 We want students to master academic standards and we want them to be confident adaptive and socially responsible Above all we want them to find

meaning and satisfaction in their lives Achieving these goals requires a concerted focus on the social emotional skills that empower students in and beyond the classroom In *Teaching to Empower* Debbie Zacarian and Michael Silverstone explore what an empowered student looks like in our increasingly diverse contemporary schools and prompt educators to examine their own relationship to empowerment The book s evidence based strategies and authentic examples show you how to foster an inclusive culture of agency self confidence and collaboration that will give each of your students regardless of race culture language socioeconomic status abilities sexuality or gender the opportunity responsibility and tools to become an active learner thoughtful community member and engaged global citizen Whether you re a preservice teacher a classroom novice or a veteran you ll find the practical guidance you ll need to Create inclusive and empowering physical learning spaces Set up self directed learning and promote positive interdependence Promote student self reflection Teach the skills of collaboration Foster the self advocacy that fuels deeper more autonomous learning Partner more effectively with families and the community to support student empowerment

Today's Mathematics, Activities and Instructional Ideas James W. Heddens, William R. Speer, 2000-08-31 This classic allows readers to easily build a valuable set of ideas and reference materials for actual classroom use Designed to aid the teacher in understanding mathematical concepts and relationships the authors reflect recent recommendations from the National Council of Teachers of Mathematics Standards 2000

Error Patterns in Computation Robert B. Ashlock, 2002 This book is the only one of its kind that instructs teachers to identify typical error patterns to receive feedback on their diagnosis and to gain insight regarding why a child may have adopted an incorrect procedure Revised to link content to the new NCTM Standards this new edition emphasizes the meaning of operations and using the appropriate method of computation As in previous editions it retains its focus on placing paper and pencil instructional activities within the context of problem solving Chapter topics cover diagnosing misconceptions and error patterns in computation providing needed instruction in computation and helping students who have learned error patterns For mathematics teachers of special education classes or at the middle school level
