Swiss years Albert Einstein,1993 **The Collected Papers of Albert Einstein** ,1994 This volume of The Collected Papers of Albert Einstein presents Einstein s writings for the two year period starting in October 1909 The initial date marks Einstein s departure from the Swiss Patent Office at Bern which had been his professional home for seven years and the beginning of his first academic appointment at the University of Zurich The volume concludes with the masterful report that Einstein by then a full professor at the German language university in Prague gave to the original Solvay Congress the first international meeting devoted to the problems of radiation and the quantum theory Most of Einstein s efforts during these years went into his struggle with these ever more perplexing problems of quanta on which he made discouragingly little progress Einstein s new academic career naturally required him to teach and almost half of this volume consists of the previously unpublished notes he wrote in preparation for his lectures on mechanics on electricity and magnetism and on kinetic theory and statistical mechanics The last of these is particularly interesting in reflecting some of his research interests Several papers here are concerned with aspects of the special theory of relativity but it is Einstein s article of June 1911 that is a harbinger of things to come it contains his calculation of the bending of light in a gravitational field on the basis of his equivalence principle

The collected papers of Albert Einstein ,1987

*The Collected Papers of Albert Einstein, Volume 4 (English)* Albert Einstein, 1996-08 This volume presents Einstein's writings from the final period of his work in Switzerland. Most of the material in Volume 4 documents Einstein's search for a relativistic theory of gravitation, a search that ended in Berlin in the fall of 1915 with the completion of the general theory of relativity. Three scientific manuscripts printed here for the first time provide insight into Einstein's efforts to generalize his original relativity theory into a theory of gravitation. The first is a review article on the special theory of relativity. The second consists of notes that document Einstein's research on gravitation. The third manuscript contains calculations on the problem of the motion of the perihelion of Mercury. The explanation of the observed anomaly of this motion was to become one of the classical tests of general relativity. The existence of such a manuscript has not been known before now. All three of these manuscripts, along with other material in this volume, add significantly to our understanding of the creation of general relativity. This supplementary paperback volume presents only the English translations of non-English materials and is not intended for use without the original language documentary edition.

**Einstein's 1912 Manuscript on the Special Theory of Relativity** Albert Einstein, 2003 This tribute to Einstein's genius opens with a brief essay by Hanoch Gutfreund, a chronology of Einstein's life, a selection of quotes by Einstein, and to introduce the manuscript, a detailed description of the manuscript, its contents, publication history, and provenance.

*The Collected Papers of Albert Einstein, Volume 2 (English)* Albert Einstein, 1989-12-21 Every document in *The Collected Papers of Albert Einstein* appears in the language in which it was written, and this supplementary paperback volume presents the English translations of all non-English materials. This translation does not include notes or annotation of the documentary volume and is not intended for use without the original language documentary edition, which provides the extensive editorial commentary necessary for a full historical and scientific understanding of the documents.

**Einstein in Context** Mara Beller, Robert S. Cohen, Jürgen Renn, 1993-10-29 This special issue of *Science and Context* examines the entire area of scientific inquiry surrounding Einstein, presenting controversies and debates within their contexts.

**The Collected Papers of Albert Einstein: The Swiss years: writings, 1912-1914** Albert Einstein, 1987

**The Collected Papers of Albert Einstein, Volume 7 (English)** Albert Einstein, 1987 The breakup of his first marriage and the divorce are presented here for the first time in all their complexity. New material shows Einstein's evolving political consciousness in light of the war. The scientific correspondence documents Einstein's struggle to find satisfactory field equations for his new gravitational theory, the general theory of relativity, and his continued discussion with many leading physicists and mathematicians about the implications and further development of the theory.
