**Repurposing epistemology for the twenty-first century and beyond: A natural accompaniment for the advancement of knowledge** Sujay Rao Mandavilli,2025-12-08 Let us begin this introduction by discussing what knowledge is But what exactly is knowledge Knowledge in its most common and mundane definition is taken to mean the information understanding and skills that are acquired through formal or informal education awareness generation mechanisms or practical experience Knowledge is also processed and formalized through a cognitive contact with

reality involving employment and deployment of the senses and cognitive ability for the most part It also required a formal awareness of facts familiarity with practical and other situations and different forms of practical ability Mechanisms of acquiring knowledge can range from rote memorization to critical thinking and the mental processing of complex facts Most people also understand knowledge as a familiarity awareness or understanding of a subject including theoretical or practical understanding of facts information and skills that are consciously acquired by perceiving discovering or learning Knowledge may be acquired either individually or through collective social action The acquisition of knowledge is an active process involving cognitive functions like perception reasoning analysis and evaluation Knowledge is not static it is a continuous and dynamic process that builds and grows over time

*Why we need a revolution in the Social sciences: A post-colonial perspective* Sujay Rao Mandavilli, 2024-05-11 We began our work in right and in serious earnest in the year 2005 November 14th 2005 to be precise when children s day is celebrated all over India in commemoration of the birthday of Pandit Jawaharlal Nehru the first Prime Minister of India The underlying philosophy of our work however stretches back to the early 1990 s even the mid 1980 s when we faced a great deal of cognitive dissonance in many of our endeavours and daily walks of life due to a constant exposure to and a bombardment by a large number of philosophies and ideas from different sources both human and non human In the year 2005 particularly after the aforesaid date we had reached out to several leading lights and luminaries in the fields of science religion philosophy and spirituality with a great deal of hope to meaningfully engage with them and elicit their own pet theories proposals and viewpoints on various issues and topics We had hoped that this would also help us in our own voyage and journey of discovery The results were indeed startling there was a wide variation in viewpoints based on the scholar in question s own religious linguistic and nationalistic affiliation and loyalties Therefore the age of ideology has still not formally or conceptually ended ending this can change many fundamental equations at a grassroots level and can make life better for all of us living in different parts of the world As a matter of fact Eurocentric biases in various fields of the social sciences has only served to throw up counter reactions and exacerbate ideological differences Intellectualism is also still weak in general particularly in developing countries particularly owing to the following factors
