Jackson,2015-08-06 Excerpt from A Short Manual of Forest Management The object of the present manual is to present a brief and simplified text book on Forest Management based on a purely practical foundation The standard works on this subject sometimes present for the student and especially for the public a rather formidable appearance and contain an exposition of high theory a part of which at the present time is seldom if ever capable of practical application to the forest conditions of our own country or of our possessions in other parts of the world An attempt is made therefore to produce a simplified practical review of this subject from which are eliminated all reference to advanced theories which are not

present susceptible of practical application and all other matters of purely academic interest Some confusion has resulted it is thought in the past from attempting to embrace in one study such diverse conditions as obtain in the most intensively worked continental forests which have been highly organised for generations in the vast forests of India which are still generally in their natural state of the utmost irregularity and thirdly in the small estate woodlands and plantations of our own country An attempt is therefore made now to discriminate between such different types of forest with a view to elucidate and facilitate the preparation of suitable working plans for each type Use has been made of the following standard works on Forest Management Manual of Forestry vol iii Sir Wm Schlich The Forester J Nisbet The Practice of Forestry P T Maw British Estate Forestry A C Forbes Forest Working Plans in India W E D Arcy About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *A Short Manual of Forest Management* Jackson Henry, 2013-01 Unlike some other reproductions of classic texts 1 We have not used OCR Optical Character Recognition as this leads to bad quality books with introduced typos 2 In books where there are images such as portraits maps sketches etc We have endeavoured to keep the quality of these images so they represent accurately the original artefact Although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy
