Photography Beyond Technique: Essays from F295 on the Informed Use of Alternative and Historical Photographic Processes Tom Persinger, 2014-02-24 Photography is not dying and has not died It has been an ever changing medium since its earliest days and while near obsession with the technology of the day may have defined photography over the course of its existence photography is so much more than hardware and software Photography is communication whether chemical or digital tangible or ephemeral in form Photography Beyond Technique is a compelling selection of essays and images that reveal the thoughts and methods of some of today s most exciting contemporary photographers These artists employ alternative historical or handmade processes and techniques and they share a comprehensive view of the medium that the choice of photographic process is just as important as the selection of subjects While other books concentrate solely on process or theory or artistic intent none focus on photography in which these decisions are considered inseparable These 20 essays originally presented at the annual F295 symposium and seminar series provide a thought provoking read for anyone interested in photography as an art form and as a medium through which to view the world Includes Looking Backward Seeing Forward Reframing Visual History by Robert Hirsch Mystery Memory and Narrative by Martha Casanave Finding Confidence Combining Process with Purpose by Mark Osterman Photograph Material and Metaphor by Jerry Spagnoli
