Range Measurement Applications

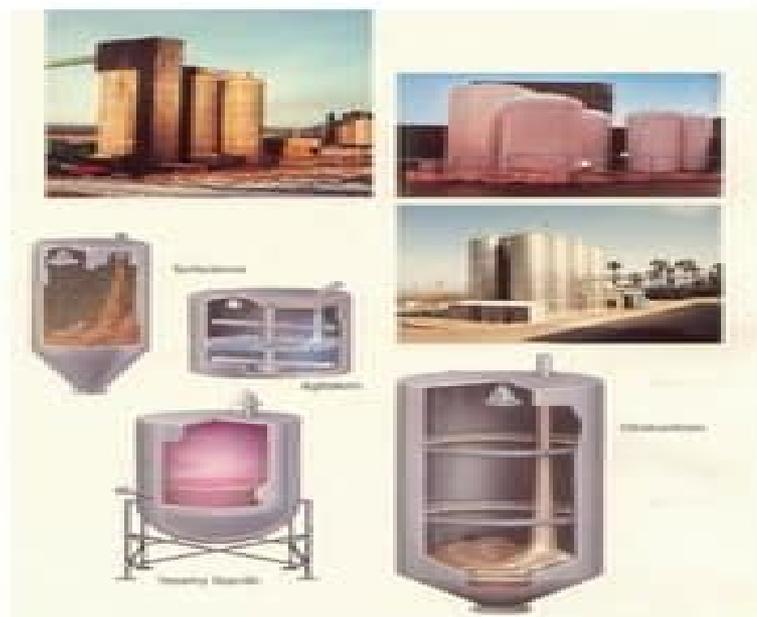

Figure 7.1: Industrial range measurement applications

Probably one of the greatest visions of the process industry has been a truly wire-and-rotate non-contact, non-intrusive continuous level measurement instrument, a single technology that can be used in every application, a device that is self-calibrating and maintenance-free, that is easy to install onto any vessel with any process connection. At the same time this device should offer an accuracy to within 1mm, it must be low-cost and capable of paying for itself in under three months while able to operate in excess of 20 years. *S.A. Instrumentation and Control, May 1998*
