comprehensive integral system consisting of four interdependent elements leadership culture team and practices and tools  
This book examines these elements following a systematic hierarchical orientation and explains their relevance for guiding  
lean initiatives It begins with the identification and establishment of strategic goals followed with strategy development and  
lastly tactical choices This model framework is cognizant of a firm s relative internal strengths and weaknesses as well as  
external opportunities and threats Each of the four integral lean system elements is explored in depth The model framework  
offers a path to develop lean leaders with practical actionable ideas suited for applications in all industries Throughout the  
book the evolution of the current body of lean knowledge is examined as well as lean s complementary initiative total quality  
management A perspective which views lean as a customer driven philosophy for organization wide continuous improvement  
and waste elimination is maintained throughout the book This second edition builds upon the first edition with additional lean

Camarinha-Matos,2006-01-04 Industries and particularly the manufacturing sector have been facing difficult challenges in a  
context of socio economic turbulence characterized by complexity as well as the speed of change in causal interconnections  
in the socio economic environment In order to respond to these challenges companies are forced to seek new technological  
and organizational solutions In this context two main characteristics emerge as key properties of a modern automation  
system agility and distribution Agility because systems need not only to be flexible in order to adjust to a number of a priori  
defined scenarios but rather must cope with unpredictability Distribution in the sense that automation and business  
processes are becoming distributed and supported by collaborative networks Emerging Solutions for Future Manufacturing
