Aldis, Roger N. McDermott, 2004-11-23 *Military*

reform has featured prominently on the agenda of many countries since the end of the Cold War necessitated a re evaluation of the strategic role of the armed forces and nowhere more publicly than in Russia Not since the 1920s have the Russian Armed Forces undergone such fundamental change President Boris Yeltsin and his successor Vladimir Putin have both grappled with the issue with varying degrees of success An international team of experts here consider the essential features of Russian military reform in the decade since the disintegration of the USSR Fluctuations in the purpose and priorities of the reform process are traced as well as the many factors influencing change Chapters analyse the development of Russia s security policy structural reform of the services the social impact of military service and experience of military conflict in Chechnya Critical evaluations of the impact of social change on the Russian Armed Forces capabilities and expectations complement the analysis of the on going debate Russian Military Reform 1992 2002 will prove invaluable to all those interested in civil military relationships and international security as well as to students of military theory and practice
