*Mathematical Modeling, Computational Intelligence Techniques and Renewable Energy* Manoj Sahni, José M. Merigó, Ritu Sahni, Rajkumar Verma, 2021-12-11 This book presents new knowledge and recent developments in all aspects of computational techniques mathematical modeling energy systems and applications of fuzzy sets and intelligent computing The book is a collection of best selected research papers presented at the Second International Conference on Mathematical Modeling Computational Intelligence Techniques and Renewable Energy MMCITRE 2021 organized by the Department of Mathematics Pandit Deendayal Petroleum University in association with Forum for Interdisciplinary Mathematics The book provides innovative works of researchers academicians and students in the area of interdisciplinary mathematics statistics computational intelligence and renewable energy

*Energy and Sustainability II* A. Mammoli, C. A. Brebbia, 2009-06-08 The way in which our society exists operates and develops is strongly influenced by the way in which energy is produced and consumed No process in Industry can be performed without sufficient supply of energy and without Industry there can be no production of commodities on which the existence of modern Society depends The energy systems evolved over a long period and more rapidly over the last two centuries as a response to the requirements of Industry and Society starting from combustion of fuels to exploiting nuclear energy and renewable resources It is clear that the evolution of the energy systems is a continuous process which involves constant technological development and innovation The presentation on the Second International Conference includes Renewable Energy Technologies Energy Management Energy Policies Energy and the Environment Energy Analysis Energy Efficiency Energy Storage and Management

**Proceedings of the ASME Advanced Energy Systems Division** American Society of Mechanical Engineers. Advanced Energy Systems Division, 2007

*Bio and Nano Packaging Techniques for Electron Devices* Gerald Gerlach, Klaus-Jürgen Wolter, 2012-07-16 This book discusses future trends and developments in electron device packaging and the opportunities of nano and bio techniques as future solutions It describes the effect of nano sized particles and cell based approaches for packaging solutions with their diverse requirements It offers a comprehensive overview of nano particles and nano composites and their application as packaging functions in electron devices The importance and challenges of three dimensional design and computer modeling in nano packaging is discussed also ways for implementation are described Solutions for unconventional packaging solutions for metallizations and functionalized surfaces as well as new packaging technologies with high potential for industrial applications are discussed The book brings together a comprehensive overview of nano scale components and systems comprising electronic mechanical and optical structures and serves as important reference for industrial and academic researchers

**Digital Transformation for Improved Industry and Supply Chain Performance** Khan, Muhammad Rahies, Khan, Naveed R., Jhanjhi, Noor Zaman, 2024-05-01 In the rapidly evolving landscape of Industry 4.0 integrating digital technologies into supply chain management SCM presents opportunities and challenges While Industry 4.0 promises

increased efficiency productivity and competitiveness its impact on sustainability within SCM remains a pressing concern Existing literature often needs to look more into the holistic integration of Industry 4 0 technologies with sustainable practices in SCM leaving a critical gap in understanding and implementation This gap not only inhibits the realization of sustainable performance but also hinders firms from aligning with global sustainability agendas such as the United Nations Sustainable Development Goals UNSDG 2030 Digital Transformation for Improved Industry and Supply Chain Performance offers a comprehensive solution by examining the integration of Industry 4 0 technology and SCM sustainability It addresses the urgent need for firms to undergo digital transformation to achieve sustainable performance It provides insights into how Industry 4 0 technologies can be strategically leveraged to promote sustainability in SCM operations Through in depth analysis of critical topics such as cybersecurity resilience circular economy practices and ethical considerations this book equips readers with the knowledge and tools necessary to navigate the complexities of Industry 4 0 enabled SCM sustainability

*Sustainable Hard Machining* Ashok Kumar Sahoo,Ramanuj Kumar,Amlana Panda,2024-07-18 Sustainable Hard Machining Implementation and Assessment analyzes the various methodologies of cooling and lubrication employed during hard machining operations along with their potential contributions towards achieving sustainable machining It includes the needs challenges and trends towards sustainable hard machining of difficult to cut materials through the application of dry minimum quantity lubrication MQL cryogenic and nanofluid assisted MQL for environmental economic ecological and societal benefits leading to environmentally cleaner sustainable machining Features Provides an introduction to hard machining sustainability and environmentally conscious machining Discusses dry and minimum quantity lubrication MQL based hard machining Includes computational methods and optimization in hard machining Reviews nano cutting fluids in hard machining Explores cryogenic cooling in hard machining This book is aimed at graduate students and researchers in mechanical engineering manufacturing and materials science

**Thermodynamic Mechanism of MQL Grinding with Nano Bio-lubricant** Changhe Li,2023-10-30 This book discusses the thermodynamic mechanism of MQL grinding with nano biological lubricant from the force heat surface integrity and micro morphology It makes up the fatal defect of the lack of heat transfer capability of traditional MQL grinding The machining accuracy surface quality especially surface integrity of the workpiece are significantly improved at the same time the service life of the grinding wheel is increased and the working environment is improved The general scope of the book s content is the effects of MQL grinding with nano bio lubricant on grinding force thermal mechanism and surface It provides a new method of sustainable green grinding for environment friendly resource saving and energy efficient utilization and solves the technical bottleneck of the insufficient capacity in MQL heat transfer
