The Dream Machine M. Mitchell Waldrop, 2018-09-25 The story of the man who instigated the work that led to the internet and shifted our understanding of what computers could be Behind every great revolution is a vision and behind perhaps the greatest revolution of our time is the vision of J C R Licklider He did not design the first personal computers or write the software that ran on them nor was he involved in the legendary early companies that brought them to the forefront of our everyday experience He was instead a relentless visionary who saw the potential in the way that individuals could interact with computers and software At a time when computers were a short step removed from mechanical data processors Licklider was writing treatises on human computer symbiosis computers as communication devices and a now not so unfamiliar Intergalactic Network His ideas became so influential his passion so contagious that author M Mitchell Waldrop calls him computing s Johnny Appleseed In a simultaneously compelling personal narrative and comprehensive historical exposition Waldrop tells the story of the man who not only instigated the work that led to the internet but also shifted our understanding of what computers were and could be This Stripe Press edition also includes the original texts of Licklider s three most influential writings Man Computer Symbiosis 1960 which outlines the vision that led to the personal computer revolution of the 1970s his Intergalactic Network memo 1963 which outlines the vision that inspired the internet and The Computer as a Communication Device 1968 coauthored with Robert Taylor which amplifies his vision for what the network could become Applications of Nature-Inspired Computing in Renewable Energy Systems Mellal, Mohamed

Arezki, 2021-12-17 Renewable energy is crucial to preserve the environment This energy involves various systems that must be optimized and assessed to provide better performance however the design and development of renewable energy systems remains a challenge It is crucial to implement the latest innovative research in the field in order to develop and improve renewable energy systems Applications of Nature Inspired Computing in Renewable Energy Systems discusses the latest research on nature inspired computing approaches applied to the design and development of renewable energy systems and provides new solutions to the renewable energy domain Covering topics such as microgrids wind power and artificial neural networks it is ideal for engineers industry professionals researchers academicians practitioners teachers and students

Distributed Applications and Interoperable Systems II Lea Kutvonen, Hartmut König, Martti Tienari, 2013-03-09 Mastering interoperability in a computing environment consisting of different operating systems and hardware architectures is a key requirement which faces system engineers building distributed information systems Distributed applications are a necessity in most central application sectors of the contemporary computerized society for instance in office automation banking manufacturing telecommunication and transportation This book focuses on the techniques available or under development with the goal of easing the burden of constructing reliable and maintainable interoperable information systems The topics covered in this book include Management of distributed systems Frameworks and construction tools Open

architectures and interoperability techniques Experience with platforms like CORBA and RMI Language interoperability e.g. Java Agents and mobility Quality of service and fault tolerance Workflow and object modelling issues and Electronic commerce The book contains the proceedings of the International Working Conference on Distributed Applications and Interoperable Systems II DAIS 99 which was held June 28 July 1 1999 in Helsinki Finland It was sponsored by the International Federation of Information Processing IFIP The conference program presents the state of the art in research concerning distributed and interoperable systems This is a topical research area where much activity is currently in progress Interesting new aspects and innovative contributions are still arising regularly The DAIS series of conferences is one of the main international forums where these important findings are reported

Howard Aiken I. Bernard Cohen, 2000 Biography of Howard Aiken a major figure of the early digital era by a major historian of science who was also a colleague of Aiken's at Harvard Howard Hathaway Aiken 1900-1973 was a major figure of the early digital era He is best known for his first machine the IBM Automatic Sequence Controlled Calculator or Harvard Mark I conceived in 1937 and put into operation in 1944 But he also made significant contributions to the development of applications for the new machines and to the creation of a university curriculum for computer science This biography of Aiken by a major historian of science who was also a colleague of Aiken's at Harvard offers a clear and often entertaining introduction to Aiken and his times Aiken's Mark I was the most intensely used of the early large scale general purpose automatic digital computers and it had a significant impact on the machines that followed Aiken also proselytized for the computer among scientists scholars and businesspeople and explored novel applications in data processing automatic billing and production control But his most lasting contribution may have been the students who received degrees under him and then took prominent positions in academia and industry I Bernard Cohen argues convincingly for Aiken's significance as a shaper of the computer world in which we now live
