## **Albert Einstein Research Papers:**

The Swiss Years Albert Einstein, 1995 This volume presents Einstein's writings from the final period of his work in Switzerland. Most of the material in Volume 4 documents Einstein's search for a relativistic theory of gravitation, a search that ended in Berlin in the fall of 1915 with the completion of the general theory of relativity. Three scientific manuscripts printed here for the first time provide insights into Einstein's efforts to generalize his original relativity theory into a theory of gravitation. The first is a review article on the special theory of relativity. The second consists of notes that document Einstein's research on gravitation. The third manuscript contains calculations on the problem of the motion of the perihelion of Mercury. The explanation of the observed anomaly of this motion was to become one of the classical tests of general relativity. The existence of such a manuscript has not been known before now. All three of these manuscripts, along with other material in this volume, add significantly to our understanding of the creation of general relativity.

### **Einstein's Annalen Papers**

Jürgen Renn, 2005-05-06 Ein spannender Einblick in ein Stück Wissenschaftsgeschichte. *Bersenblatt* 3 2005: 1905 in seinem *Annus Mirabilis* machte Albert Einstein drei Entdeckungen über die Grundlagen der Natur, die die Basis für seinen Ruhm als Physiker bildeten. Diese drei revolutionären Artikel über die Lichtquantenhypothese, die Brownsche Molekularbewegung sowie die Spezielle Relativität wurden in der Zeitschrift *Annalen der Physik* veröffentlicht. Alle drei gelten heute als Säulen der modernen Wissenschaft und ihrer Anwendungen in der Technologie und sind aus der modernen Welt nicht mehr wegzudenken. Der vorliegende Band präsentiert sämtliche von Albert Einstein in der Zeitschrift *Annalen der Physik* veröffentlichten Beiträge, darunter einige der wichtigsten Artikel, die er jemals schrieb. Enthalten sind ebenso die revolutionären Artikel des Jahres 1905 als Faksimileabdruck. Darüber hinaus enthält der Band Beiträge, welche die Folgen der bahnbrechenden Ideen dieser Artikel von  $E=mc^2$  bis zur Quantentheorie der spezifischen Wärme aufzeigen. Die Wissenschaftshistoriker Jürgen Renn (MPI für Wissenschaftsgeschichte, Berlin), David C. Cassidy (Hofstra Universität, Hempstead, USA), Michel Janssen (Universität von Minnesota, USA) und Robert Rynasiewicz (John Hopkins Universität, USA) haben die vorliegende Sammlung durch aktuelle Artikel ergänzt und kommentiert.

Albert Einstein, 1996-08 This volume presents Einstein's writings from the final period of his work in Switzerland. in this volume add significantly to our understanding of the creation of general relativity This supplementary paperback volume presents only the English translations of non English materials and is not intended for use without the original language documentary edition The collected papers of Albert Einstein: The Berlin years : writings, 1914-1917 Albert Einstein,1987 The breakup of his first marriage and the divorce are presented here for the first time in all their complexity New material shows Einstein's evolving political consciousness in light of the war The scientific correspondence documents Einstein's struggle to find satisfactory field equations for his new gravitational theory the general theory of relativity and his continued discussion with many leading physicists and mathematicians about the implications and further development of the theory

would vanish into his desk drawer as soon as he heard footsteps approaching his door He probably discarded many pieces of papers and calculations and flung them in the waste paper basket in the Patent Office The end result was that Einstein published nothing regarding the special theory of relativity prior to 1905 For many years before 1905 he had been intensely concerned with the topic in fact he was busily working on the problem for seven or eight years prior to 1905 Unfortunately there are no surviving notebooks and manuscripts no notes and papers or other primary sources from this critical period to provide any information about the crucial steps that led Einstein to his great discovery In May 1905 Henri Poincar sent three letters to Hendrik Lorentz at the same time that Einstein wrote his famous May 1905 letter to Conrad Habicht promising him four works of which the fourth one Relativity was a rough draft at that point In the May 1905 letters to Lorentz Poincar presented the basic equations of his 1905 Dynamics of the Electron meaning that at this point Poincar and Einstein both had drafts of papers relating to the principle of relativity The book discusses Einstein s and Poincar s creativity and the process by which their ideas developed The book also explores the misunderstandings and paradoxes apparent in the theory of relativity and unravels the subtleties and creativity of Einstein

This book analyzes one of the three great papers Einstein published in 1905 each of which would alter forever the field it dealt with The second of these papers On the Electrodynamics of Moving Bodies had an impact in a much broader field than electrodynamics it established what Einstein sometimes referred to after 1906 as the so called Theory of Relativity Miller uses the paper to provide a window into the intense intellectual struggles of physicists in the first decade of the 20th century the interplay between physical theory and empirical data the fiercely held notions that could not be articulated clearly or verified experimentally the great intellectual investment in existing theories data and interpretations and associated intellectual inertia and the drive to the long sought for unification of the sciences Since its original publication this book has become a standard reference and sourcebook for the history and philosophy of science however it can equally well serve as a text in the history of ideas or of twentieth century philosophy From reviews of the previous edition Miller has written a superb perhaps definitive historical study of Einstein s special theory of relativity One comes away from the book with a respect for both the creative genius of the man and his nerve he simply brushed aside much of the work that was going on around him The New Yorker Departments of Labor, and Health, Education and Welfare, and Related Agencies Appropriations United States.
