

Chapter 5 FRAPPY!

Directions: Show all your work. Indicate clearly the methods you use, because you will be scored on the correctness of your methods as well as on the accuracy and completeness of your results and explanations.

A statistics teacher has 40 students in his class, 23 females and 17 males. At the beginning of class on a Monday, the teacher planned to spend time reviewing an assignment due that day. Unknown to the teacher, only 19 of the females and 11 of the males had completed the assignment. The teacher plans to randomly select students to do problems from the assignment on the whiteboard.

(a) What is the probability that a randomly selected student has completed the assignment?

$$\begin{aligned} P(\text{complete}) &= 30/40 \\ &= 0.75 \end{aligned}$$

the probability that a randomly selected student has completed the assignment is 0.75

(b) Are the events "selecting a female" and "selecting a student who completed the assignment" independent? Justify your answer.

$$P(\text{female}) = 23/40 = 0.575$$

$$P(\text{female} \mid \text{complete}) = 19/30 = 0.633$$

these two probabilities are not the same. (0.575 does not equal to 0.633 or $P(\text{female})$ does not equal to $P(\text{female} \mid \text{complete})$.)

Therefore, no, the events "selecting a female" and "selecting a student who completed the assignment" are not independent because the probabilities are not equal to one another.

New York's Scoundrels, Scalawags, and Scrapppers John Tauranac, 2025-06-03 The 1890s was the tail end of the Gilded Age It was not a Golden Age it was a veneer and although the decade is specifically called The Gay Nineties the gaiety was generally reserved for the top ten percenters If you were a common working stiff or worse a common working stiffette life was not so gay Most New Yorkers played by the rules of the game although some fudged a bit Others along with the managements of some businesses and some administrations of the municipality played by totally different rules successfully gaming the system to their advantage The few who fought for truth and justice generally went down fighting These are New York s scoundrels scalawags and scrapppers The Social Production of Knowledge in a Neoliberal Age Justin Cruickshank, Ross Abbinnett, 2022-04-04 Higher education exposes a key paradox of neoliberalism The project of neoliberalism was said to be that of rolling back the state to liberate individuals by replacing government bureaucracy with the free market Rather than have the market serve individuals however individuals were to serve the market The marketisation reforms in higher education which sought to reshape knowledge production with students investing in human capital and academics producing transferable research to make higher education of use to the economy has resulted in extensive government bureaucracy and oppressive managerialist bureaucracy which is inefficient and expensive Neoliberalism has always had authoritarian aspects and these are now coming to bear on universities The state does not want critical and informed graduate citizens but a hollowed out public sphere defined by consumption willing servitude to the market and deference to state power Attempts to reshape universities with bureaucracy are now accompanied by a culture war attacking the production of critical knowledge The authors in this book explore these issues and the possibilities for resistance and progressive change
