## Introduction

This chapter gives an overview of some of the topics that will be covered so the reader can get a coherent picture of the types of problems and associated mathematical structures that will be developed.<sup>1</sup>

### 1.1 The Classical Water Molecule and the Ozone Molecule

An example that will be used to illustrate various concepts throughout these lectures is the *classical (non-quantum) rotating “water molecule”*. This system consists of three particles interacting by interparticle conservative forces (one can think of springs connecting the particles, for example) so that the total energy of the system, which will be taken as our Hamiltonian, is the sum of the kinetic and potential energies. This system is shown in Figure 1.1.1. The interesting special case of three equal masses gives the “ozone” molecule.

We use the term “water molecule” mainly for terminological convenience. The full problem is of course the classical *three body problem* in space. However, thinking of it as a rotating system evokes certain constructions that we wish to illustrate.

Imagine this mechanical system rotating in space and, simultaneously, undergoing vibratory, or *internal* motions. We can ask a number of questions:

- How does one set up the *equations of motion* for this system?

---

<sup>1</sup>We are grateful to Oliver O’Reilly, Rick Wicklin, and Brett Zombro for providing a helpful draft of the notes for an early version of this lecture.

**Brillouin Scattering Part 1**, 2022-06-24 Brillouin Scattering Volume 109 in the Semiconductors and Semimetal series marks the centenary of Leon Brillouin's seminal 1922 paper which provided a detailed theory of the effect that now bears his name Stimulated Brillouin Scattering SBS is the strongest third order optical nonlinearity and plays an important role in contemporary science and applications particularly lasers communications and fibre optics as well as playing a new role in experimental physics and the life sciences This volume provides a foundational perspective on Brillouin scattering starting with a historical review of Brillouin scattering the theory of SBS and the convergence between SBS and Optomechanics We then consider SBS in several different waveguide geometries including photonic crystal fibres integrated optics and superfluids From the leading researchers in the field Historical theoretical and scientific perspective Pedagogical

Academic Migration, Discipline Knowledge and Pedagogical Practice Colina Mason, Felicity Rawlings-Sanaei, 2013-11-26 This volume makes a distinctive and innovative contribution to the globalisation of higher education literature by highlighting the myriad benefits of academic migration Sixteen academic migrants across the Asia Pacific region reflect on their experiences and wisdom gained across geographical cultural and disciplinary domains Each one provides an authentic account of ways in which their experiences and insights have benefited their host institutions and enhanced their pedagogical practice The groundbreaking volume calls for a shift in academic culture one in which academic migrants are respected for their cultural social and intellectual resources their enhanced interpretive ability and their capacity to view the world through multiple lenses Are these not the characteristics of educators which universities seek in their efforts to internationalise their institutions and develop in their students an understanding of global citizenship The volume forges new territory in articulating the relationship between academic migrants conceptual understanding and the construction of knowledge The following themes are addressed in this book Migration of Ideas Conceptual Understanding and Pedagogical Enrichment Indigenous Pedagogies and Bridging Worldviews Changing Academic Identities and Reshaping Pedagogies Teaching Practice and the Academic Diaspora Handbook of the Economics of Art and Culture Victor A. Ginsburgh, David Throsby, 2006-09-13 Over the last 30 or 40 years a substantial literature has grown up in which the tools of economic theory and analysis have been applied to problems in the arts and culture Economists who have surveyed the field generally locate the origins of contemporary cultural economics as being in 1966 the year of publication of the first major work in modern times dedicated specifically to the economics of the arts It was a book by Baumol and Bowen which showed that economic analysis could illuminate the supply of and demand for artistic services the contribution of the arts sector to the economy and the role of public policy Following the appearance of the Baumol and Bowen work interest in the economics of the arts grew steadily embracing areas such as demand for the arts the economic functions of artists the role of the nonprofit sector and other areas Cultural economics also expanded to include the cultural or entertainment industries the media movies the

publishing industry popular music as well as heritage and museum management property right questions in particular copyright and the role of new communication technologies such as the internet The field is therefore located at the crossroads of several disciplines economics and management but also art history art philosophy sociology and law The Handbook is placed firmly in economics but it also builds bridges across these various disciplines and will thus be of interest to researchers in all these different fields as well as to those who are engaged in cultural policy issues and the role of culture in the development of our societies Presents an overview of the history of art markets Addresses the value of art and consumer behavior toward acquiring art Examines the effect of art on economies of developed and developing countries around the world

Attracting and Keeping the Best Teachers Anna Sullivan, Bruce Johnson, Michele Simons, 2019-08-26 This book challenges dominant thinking about early career teachers and their work It offers an in depth and critical analysis of policies concerning the work of early career teachers and how they are supported during this critical period when they are highly vulnerable to leaving the profession Moreover the book provides examples from actual practice that illustrate how to help early career teachers make a successful transition into the profession These practices promote early career teachers development and help the profession as a whole to capitalize on the new knowledge and skills that these teachers bring to their classrooms and their students The book is divided into two main parts Part 1 deals with the difficult to define process of

retaining early career teachers and its respective chapters consider this broad issue from an international perspective They explore how policies and practices have an impact on what happens in schools and what it means to be a teacher and to teach In turn Part 2 focuses on the need to reconsider the policies and practices that create the problem of early career teachers and offers alternative ways forward Each chapter addresses a specific aspect of the early career teacher retention issue contributing to a greater understanding of how we can rethink the work of early career teachers so that they can more successfully transition into the profession
