Balancing the Common Core Curriculum in Middle School Education James H. Bunn, 2017-01-09 This book examines the idea of good education, which is thought to include a scientific and technical component, a mathematical component, a writing component, and an ethical and aesthetic component. Bunn proposes a new three-way intersection in these teachings: the basic sciences and mechanics of leveraging on a seesaw, the basic formulations of patterning an algebraic equation, and the basic rules for writing a sentence in English. In all three forms of inquiry, balance is the mainstay through which problems in US middle school education are brought together and analyzed.
