On Board Apollo Moonships:

Chariots for Apollo Courtney G. Brooks, James M. Grimwood, Loyd S. Swenson, Paul Dickson, 2009-03-26 Written by a trio of experts this is the definitive reference on the Apollo spacecraft and lunar modules It traces the design of the vehicles their development and their operation in space More than 100 photographs and illustrations highlight the text which begins with NASA s origins and concludes with the triumphant Apollo 11 moon mission Where No Man Has Gone Before William David Compton, 1989

Reaching for the Moon Hal Marcovitz, 2001 Surveys the achievements of the Apollo program and the astronauts and other individuals who made the program a success

The Apollo 11 Moon Landing Amy Maranville, 2021-01-08 On July 20 1969 Neil Armstrong took one giant leap for mankind when he became the first person to set foot on the moon Now readers can step back in time to learn about what led up to the Apollo 11 moon landing how the historic event unfolded and the ways in which one remarkable day changed America forever Airman, 1969

Where No Man Has Gone Before William David Compton, 2012-08-03 This official NASA history chronicles the behind the scenes conflicts and cooperation during the Apollo expeditions It shows how the space agency s scientists who were primarily interested in the moon itself worked out their differences with the engineers who were charged with the astronauts safe landing and return The close collaboration between the scientists and engineers ensured the success of a program that remains a major achievement for both fields The first half of the book concerns the preparations for the Moon landings tracing the development of the Apollo science program from the earliest days The second half documents the flights that followed Apollo 11 during which twelve astronauts explored the lunar surface and returned with samples for investigation The author drew upon the Lyndon B Johnson Space Center s collection of more than 31 000 Apollo related documents and conducted more than 300 interviews with program participants to assemble this definitive survey

Taking Science to the Moon Donald A. Beattie, 2003-07-03 A former NASA scientist shares a behind the scenes history of the Apollo space program and the fight to include science activities in the missions In 1961 President Kennedy set a goal of putting a man on the moon in order to assert American dominance in the escalating Cold War The mission s sole purpose was to beat the Soviets to the punch So how did science get aboard the Apollo rockets And what did scientists do with the space allotted to them Donald A Beattie served at NASA from 1963 to 1973 in several management positions including as program manager of Apollo Lunar Surface Experiments In Taking Science to the Moon Beattie takes readers inside NASA headquarters and the struggle to include science payloads and lunar exploration as part of the Apollo program

Mission to the Moon Erlend A. Kennan, Edmund H. Harvey, 1969

Boys' Life, 1994-07 Boys Life is the official youth magazine for the Boy Scouts of America Published since 1911 it contains a proven mix of news nature sports history fiction science comics and Scouting

History of the Space Shuttle, Volume Two T. A. Heppenheimer, 2014-09-30 Basing his work on virtually untapped NASA archives T A Heppenheimer has produced the second volume of his definitive history of the space shuttle Volume Two traces

the development of the shuttle through a decade of engineering setbacks and breakthroughs program management challenges and political strategizing culminating in the first launch in April 1981 The focus is on the engineering challenges propulsion thermal protection electronics onboard systems and the author covers in depth the alternative vehicles developed by the U S Air Force and European countries The first launch entailed a monumental amount of planning and preparation that Heppenheimer explains in detail

Apollo Al Cimino,2019-05-14 Apollo follows man s dream of walking among the stars and charts how space travel and space programs have grown since then In 2019 it will have been 50 years since Neil Armstrong became the first man to walk on the Moon When his famous words came crackling across the atmosphere That s one small step for man one giant leap for mankind The first moon landing took place on July 20 1969 during the Apollo 11 mission Nine days earlier on July 11 1969 David Bowie released his iconic Space Oddity song about Major Tom the astronaut The two events resonated with people back on Earth like a match made in the heavens The crew of Apollo 11 Neil Armstrong Buzz Aldrin and Michael Collins had been launched into space by the powerful Saturn 5 a three stage rocket which was about as tall as a 36 story building It was the culmination of NASA s human spaceflight program which began 1961 This is the story of the Apollo Missions with all of its ups and downs in 1967 a cabin fire killed the entire crew of Apollo 1 and after an oxygen tank exploded the Apollo 13 crew limped back to Earth using the lunar module as lifeboat But despite Apollo s many setbacks twelve men walked on the Moon and their place in American history was assured forever

The Apollo Missions David Baker,2018-12-12 Long has the moon captured the imagination of world from science fiction to astrology howling wolves to lunar calendars To President John F Kennedy however the moon was a destination To put a man on the moon would be to challenge Russia s recent achievements in space exploration and assert the US s technological prowess on the world stage As we know the mission was a success and yet while everyone is familiar with Neil Armstrong s iconic line and his bold tread on the moon s dusty surface few are privy to the events leading up to this moment Former NASA engineer David Baker gives a behind the scenes account of the space race including the political impetus behind the mission the Apollo 8 s lunar orbit on Christmas Eve as well as some of the tale s tragedies Bursting with fascinating stories striking photographs of the team and exclusive material provided by NASA personnel this book perfectly captures the risk complexity and gravitas of this immense journey

design modification this turned out to severely damage the internal heating elements of the tank **John Houbolt** William F. Causey,2020-03-15 In May 1961 President Kennedy announced that the United States would attempt to land a man on the moon and return him safely to the earth before the end of that decade Yet NASA did not have a specific plan for how to accomplish that goal Over the next fourteen months NASA vigorously debated several options At first the consensus was to send one big rocket with several astronauts to the moon land and explore and then take off and return the astronauts to earth in the same vehicle Another idea involved launching several smaller Saturn V rockets into the earth orbit where a lander would be assembled and fueled before sending the crew to the moon But it was a small group of engineers led by John C Houbolt who came up with the plan that propelled human beings to the moon and back not only safely but faster cheaper and more reliably Houbolt and his colleagues called it lunar orbit rendezvous or LOR At first the LOR idea was ignored then it was criticized and then finally dismissed by many senior NASA officials Nevertheless the group under Houbolt s leadership continued to press the LOR idea arguing that it was the only way to get men to the moon and back by President Kennedy s deadline Houbolt persisted risking his career in the face of overwhelming opposition This is the story of how John Houbolt convinced NASA to adopt the plan that made history Vision 2001 United States.
