Noninvasive Physiological Measurement James C. Lin, 2024-05-08 This book explains the principles and techniques of microwave physiological sensing and introduces fundamental results of the noninvasive sensing of physiological signatures vital signs as well as life detection Specifically noninvasive microwave techniques for contact contactless and remote sensing of circulatory and respiratory movements and physiological volume changes are discussed Noninvasive Physiological Measurement Wireless Microwave Sensing is written by a pioneering researcher in microwave noninvasive physiological sensing and leading global expert in microwaves in biology and medicine The book reviews current advances in noninvasive cardiopulmonary sensing technology and measurement It includes measurements of the vital signs and physiological signatures from laboratory and clinical testing The book discusses the applicable domains and scenarios in which there is an interaction of radio frequency RF and microwaves with biological matter in gas fluid or solid form both from inside and outside of the human or animal body The book also provides examples for healthcare monitoring and diagnostic applications through wearables devices or remote contactless sensors for physiological signals and signature vital signs and body motion sensing This book is an essential guide to understanding the human body's interaction with microwaves and noninvasive

physiological sensing and monitoring This book is intended for researchers and professionals in biomedical electrical and computer engineering with an interest in antenna sensors microwaves signal processing and medical applications It will also be of interest to healthcare professionals technologists and practitioners interested in noninvasive physiological sensing and patient monitoring

Non-Newtonian Fluid Mechanics and Complex Flows Angiolo Farina,Andro Mikelić,Lorenzo Fusi,Giuseppe Saccomandi,Adélia Sequeira,Eleuterio F. Toro,2018-06-25 This book presents a series of challenging mathematical problems which arise in the modeling of Non Newtonian fluid dynamics It focuses in particular on the mathematical and physical modeling of a variety of contemporary problems and provides some results The flow properties of Non Newtonian fluids differ in many ways from those of Newtonian fluids Many biological fluids blood for instance exhibit a non Newtonian behavior as do many naturally occurring or technologically relevant fluids such as molten polymers oil mud lava salt solutions paint and so on The term complex flows usually refers to those fluids presenting an internal structure fluid mixtures solutions multiphase flows and so on Modern research on complex flows has increased considerably in recent years due to the many biological and industrial applications

Black Transhuman Liberation Theology Philip Butler,2019-12-12 Mediating Black religious studies spirituality studies and liberation theology Philip Butler explores what might happen if Black people in the United States merged technology and spirituality in their fight towards materializing liberating realities The discussions shaping what it means for humans to exist with technology and as part of technology are already underway transhumanism suggests that any use of technology to augment intellectual psychological or physical capability makes one transhuman In an attempt to encourage Black people in the United States to become technological progenitors as a spiritual act Butler asks whether anyone has ever been just human Butler then explores the implications of this question and its link to viewing the body as technology Re imagining incarnation as a relationship between vitality biochemistry and genetics the book also takes a critical scientific approach to understanding the biological embodiment of Black spiritual practices It shows how current and emerging technologies might align with the generative biological states of Black spiritualities in order to concretely disrupt and dismantle oppressive societal structures
