Spatial Modelling of Flood Risk and Flood Hazards Biswajeet Pradhan, Pravat Kumar Shit, Gouri Sankar Bhunia, Partha Pratim Adhikary, Hamid Reza Pourghasemi, 2022-04-06 Floods and flash floods with hydro meteorological and tropical cyclones are some of the most devastating natural disasters causing massive damages to natural and man made features. Flood hazards are a major threat to human life, properties, agricultural area, yield, production, buildings and homes, and infrastructures, bridges, roads, railways, urban infrastructures, etc. Flood hazards susceptibility mapping, risk assessment, and modelling is an essential step for early warning systems, emergency services, prevention, and mitigation of future environmental and social hazards and implementation of risk management strategies. Due to the lack of proper information technology based policies and strategies, mapping and modelling can often not be implemented to the best possible level. Geo spatial techniques have enjoyed rising interest in recent decades among the earth, environmental, and social sciences research communities for their powerful ability to solve and understand various complex problems and develop novel approaches toward sustainable earth and human society. By linking geo spatial computational intelligence techniques with societal and environmental oriented problems, this book demonstrates geospatial technology approaches to data mining, techniques, data analysis, modelling, risk assessment, and visualization and management strategies in different aspects of flood hazards. We believe that a diverse group of academics, scientists, geographers, hydrologists, remote sensing, and GIS expertise, environmentalists, meteorologists, and computing experts with a common interest in geospatial sciences within the earth, environmental sciences, and humanistic and social sciences will find this book to be of great value. Micro and Nanoelectronics Devices, Circuits and Systems Trupti Ranjan Lenka, Durgamadhab Misra, Arindam Biswas, 2021-09-09 The book presents select proceedings of the International Conference on Micro and Nanoelectronics Devices, Circuits and Systems, MNDCS 2021. The volume includes cutting edge research papers in the emerging fields of micro and nanoelectronics devices, circuits, and systems from experts working in these fields over the last decade. The book is a unique collection of chapters from different areas with a common theme and will be immensely useful to academic researchers and practitioners in the industry who work in this field. **Computer Vision and Image Analysis for Industry 4.0** Nazmul Siddique, Mohammad Shamsul Arefin, Md Atiqur Rahman Ahad, M.
