It has been in the computer programming field for well over 40 years and it is known as a high level language due to the competence it has established in the programming field. JavaScript is used by various software companies in the world so much that many computer operations will not work without it. So it's a great idea to try using it too. The most exciting feature of JavaScript is that it allows you to program using English based commands, not numeric codes, and that makes it a whole lot easier for humans to program. This means programmers can read and easily understand the computer language. Another uniqueness of JavaScript is that the producing company always updates the language so that modern operations and newly developed patterns can be easily programmed into a computer.
