Evolving Ourselves Juan Enriquez, Steve Gullans, 2016-11-15 An eye opening mind bending exploration of how mankind is reshaping its genetic future based on the viral TED Talk series *Will Our Kids Be a Different Species* and *The Next Species of Human*. Are you willing to engineer the DNA of your unborn children and grand children to be healthier. Better looking. More intelligent. Why are rates of autism, asthma and allergies exploding at an unprecedented pace. Why are humans living longer and having far fewer kids. Futurist Juan Enriquez and scientist Steve Gullans conduct a sweeping tour of how humans are changing the course of evolution for all species, sometimes intentionally, sometimes not. For example, What if life forms are limited only by the bounds of our imagination. Are designer babies and pets de-extinction even entirely new species, fair game. As humans, animals and plants become ever more resistant to disease and aging, what will become the leading causes of death. Man-machine interfaces may allow humans to live much longer. What will happen when we transfer parts of our selves into clones, into stored cells and machines. Though these harbingers of change are deeply unsettling, the authors argue we are also in an epoch of tremendous opportunity. Future humans, perhaps a more diverse, resilient, gentler and intelligent species, may become better caretakers of the planet, but only if we make the right choices now. Intelligent, provocative and optimistic, *Evolving Ourselves* is the ultimate guide to the next phase of life on Earth. Chosen by *Nature* magazine as a Fall 2016 season highlight.
