Biomedical Science Practice
 Nessar Ahmed, 2022. The Fundamentals of Biomedical Science series has been written to reflect the challenges of practicing biomedical scientists today. It draws together essential basic science with insights into laboratory practice to show how an understanding of the biology of disease is linked to analytical approaches that lead to diagnosis. The series reviews the full range of disciplines to which a biomedical scientist may be exposed, from microbiology to cytopathology to transfusion science. The third edition of Biomedical Science Practice gives a comprehensive overview of key laboratory techniques and professional practical skills with which students will need to be familiar to be successful in a professional biomedical environment. The text discusses a broad range of professional skills and concepts such as health and safety considerations, personal development and communication, and confidentiality. The text also explores key experimental and analytical approaches which form the basis of the investigation and diagnosis of clinical conditions. Each chapter is supported with engaging clinical case studies written to emphasize the link between theory and practice, and a set of end-of-chapter questions which encourages students to test their knowledge and stretch their understanding. The third edition is available for students and institutions to purchase in a variety of formats and is supported by online resources. The e-book offers a mobile experience and convenient access along with functionality, navigation features, and links that offer extra learning support. www.oxfordtextbooks.co.uk/ebooks Online student resources supporting the book include: Answers to case study and self-check questions; Multiple choice questions; An interactive Digital Microscope encouraging the exploration of tissue samples; Video podcasts including interviews with practicing biomedical scientists and in-the-lab footage showing biomedical science in practice. Questioning Performance David Eves, John Selwyn Gummer, M P John Gummer, 2006-02. Why directors and senior managers need this book: you have personal responsibilities for health, safety, and environment; your organisation faces a host of legal requirements and liabilities; your company reputation could suffer if you don't tackle these issues; and you will feel the heat of the shareholder and stakeholder pressure with bottom-line consequences you need to take on board. Compelling moral

and ethical reasons for getting these issues right it's not just about what's happening on your home turf these issues have significant European and global dimensions There is no other book out there like this one this definitive new title gives directors all they need to know about health safety and the environment It won't swamp you with technical detail of legal overkill and it won't try to convert to you into an environmental evangelist or safety expert But Questioning Performance will help senior people to gain assurance and discharge their responsibilities properly by enabling them to ask the right questions understand the answers and see that they and their board take the best decisions about managing health safety and environment risks Engaging in meaningful dialogue with expert advisers can be tough This book builds a bridge between directors and expert professionals employed in house or consultants and enable directors to develop effective and productive discussions with health safety and environment practitioners managers trade union officials safety reps and enforcers You may not be passionate about health safety and the environment and you may not think of these issues as your top priority but as an individual along with your company you're legally responsible for managing the risks properly and can be held personally liable for the consequences of failure Once on the statute books the new corporate manslaughter law will add further weight to your health and safety responsibilities at least
