Almanack ,2006 Separation Technology John Garside,Institution of Chemical Engineers (Great Britain),1994 Separation
technology is at the heart of engineering in the chemical and process industries This book takes the pulse of the technology
and assesses its health for future use Recently separation technology has been under pressure to improve both the quality
and diversity of products In response the condition of older technologies drying crystallization and distillation has been
improved while newer ideas like adsorption and bioseparations have been brought rapidly into training Understanding of the
underlying phenomena of separations argue the authors leads to better equipment design and more applications Newer
processes depend on subtle differences in the molecular architecture of the components to be separated chiral molecules for
example The way in which this is reflected at a larger scale is one of the themes of the book Case Studies in
