Laboratory Test requesting Appropriateness and Patient Safety María Salinas, Maite Lopez-Garrigos, Enrique Rodriguez-Borja, Álvaro Blasco, Arturo Carratalá, 2016-12-05 The global medical process is a chain of different medical multidisciplinary procedures The success in global Patient Safety will depend on the Safety of the consecutive medical processes that intervene in this complex system Laboratory data is an essential part of health care indeed it is used in 70% of clinical decisions Inappropriate laboratory test over requesting is extremely frequent The prevalence of under requesting has been less studied The consequences of under requesting are clear we are missing a diagnosis Inappropriate over requesting can result not only in a problem of cost but also in a problem regarding patient safety Additionally another important consequence of inappropriate tests over requesting is that such amount of unnecessary tests has probably contributed to a significant increase in the volume of those over the last years In all there is general consensus that the inadequacy of test requesting must be corrected through strategies and monitored over time through indicators to assure the optimal laboratory contribution to clinical decision making and patient safety

Modern Clinical Molecular Techniques Peter Hu, Madhuri Hegde, Patrick Alan Lennon, 2012-05-11 This timely book covers the need to know clinical practices for all those involved in molecular laboratory science The field of molecular medicine is evolving at an astounding speed Propelled by the new insights and technologies advances are being made at an unprecedented rate With dual measure given to today's breakthroughs this book is a collection of the most current practices relevant to the clinical molecular laboratorian It begins with an introductory section on techniques and procedure It then presents four separate sections on infectious disease oncology pre post natal and identity testing with specific chapters clearly outlining clinical protocols used in daily practice Modern Clinical Molecular Techniques cuts to the heart of what is essential for the practicing molecular laboratory scientist It is an outstanding resource for those operating within or looking to set up a clinical molecular laboratory

Nonclinical Statistics for Pharmaceutical and Biotechnology Industries Lanju Zhang, 2016-01-13 This book serves as a reference text for regulatory industry and academic statisticians and also a handy manual for entry level Statisticians Additionally it aims to stimulate academic interest in the field of Nonclinical Statistics and promote this as an important discipline in its own right This text brings together for the first time in a single volume a comprehensive survey of methods important to the nonclinical science areas within the pharmaceutical and biotechnology industries Specifically the Discovery and Translational sciences the Safety Toxicology sciences and the Chemistry Manufacturing and Controls sciences Drug discovery and development is a long and costly process Most decisions in the drug development process are made with incomplete information The data is rife with uncertainties and hence risky by nature This is therefore the purview of Statistics As such this book aims to introduce readers to important statistical thinking and its application in these nonclinical areas The chapters provide as appropriate a scientific background to the topic relevant regulatory guidance current statistical practice and further research
