

World Wide Web

SURFACE WEB

The portion of the World Wide Web that is indexed by search engines. It can be viewed by general users on standard Web browsers.

DEEP WEB

This part of the Web extends beyond the reach of typical search engines because it includes unindexed sites, fee-for-service (FFS) content, and private databases such as password-protected e-mail accounts. The deep web comprises the overwhelming majority of online content.

DARK WEB

An encrypted network that can be accessed only with a specialized browser or application. The most common method of interacting with the dark web is through The Onion Router (Tor), an anonymizing platform that routes encrypted traffic through a series of nodes. Criminal and antisocial behaviour appear to account for the majority of dark web activity.
