ais et de sa diffusion dans le monde dépend largement de l'adoption de l'enseignement aux technologies de la communication et de l'information TIC ainsi que de leur utilisation efficace et créative dans l'enseignement apprentissage du français. La montée en puissance du numérique fait que les TIC font de plus en plus partie des outils de base de tout enseignant de langues et que la classe de langues devient au moins en partie numérique. Dans un monde où la technologie évolue un rythme exponentiel débouchant sans cesse sur de nouvelles applications il est crucial de nous interroger en permanence sur la plus-value didactique de ces solutions technologiques. Comment valuer le potentiel des technologies émergentes ? Comment mettre en place des approches didactiques intégrant le numérique ? Comment estimer la plus-value effective de dispositifs de formation concrets intégrant le numérique ? C'est ces questions et tant d'autres que les 31 communications provenant de 15 pays rassemblés dans le 4^e volume des Actes électroniques du Congrès de Liège consacré au français l'ère du numérique tentent d'explorer.

web dissipation in a linear oscillator is commonly described by the relaxation time or equivalently the dissipation rate or by
either of two dimensionless quantities the quality factor q and the relaxation factor

web nov 17 2023 dissipation is a common occurrence in real world systems and is generally considered to be detrimental to
transport in this study we examine the transport properties of a narrow quantum anomalous hall system with dissipation
applied on one edge when the fermi level resides within the hybridization gap we find that while transport is
