Precast Concrete Structures Kim S. Elliott,2019-08-08 This second edition of Precast Concrete Structures introduces the conceptual design ideas for the prefabrication of concrete structures and presents a number of worked examples that translate designs from BS 8110 to Eurocode EC2 before going into the detail of the design manufacture and construction of precast concrete multi storey buildings Detailed structural analysis of precast concrete and its use is provided and some details are presented of recent precast skeletal frames of up to forty storeys The theory is supported by numerous worked examples to Eurocodes and European Product Standards for precast reinforced and prestressed concrete elements composite construction joints and connections and frame stability together with extensive specifications for precast concrete structures The book is extensively illustrated with over 500 photographs and line drawings

Design in Modular Construction Mark Lawson,Ray Ogden,Chris Goodier,2014-02-24 Modular construction can dramatically improve efficiency in construction through factory production of pre engineered building units and their delivery to the site either as entire buildings or as substantial elements The required technology and application are developing rapidly but design is still in its infancy Good design requires a knowledge of modular production installation and interface issues and also an understanding of the economics and client related benefits which influence design decisions Looking at eight recent projects along with background information this guide gives you coverage of generic types of module and their application vertical loading stability and robustness dimensional and spacial planning hybrid construction cladding services and building physics fire safety and thermal and acoustic performance logistical aspects such as transport tolerances and safe installation A valuable guide for professionals and a thorough introduction for advanced students

**Quality Function Deployment for Buildable and Sustainable Construction** Singhaputtangkul Natee,Sui Pheng Low,Evelyn A. L. Teo,2015-10-16 This book focuses on the implementation of Quality Function Deployment QFD in the construction industry as a tool to help building designers arrive at optimal decisions for external envelope systems with sustainable and buildable design goals In particular the book integrates special features into the conventional QFD tool to enhance its performance These features include a fuzzy multi criteria decision making method fuzzy consensus scheme and Knowledge Management System KMS This integration results in a more robust decision support tool known as the Knowledge based Decision Support System QFD KBDSS QFD tool As an example the KBDSS QFD tool is used for the assessment of building envelope materials and designs for high rise residential buildings in Singapore in the

early design stage The book provides the reader with a conceptual framework for understanding the development of the KBDSS QFD tool The framework is presented in a generalized form in order to benefit building professionals decision makers analysts academics and researchers who can use the findings as guiding principles to achieve optimal solutions and boost efficiency *UK National Annex to Eurocode 2* British Standards Institute Staff,2005-12-08 Buildings Structural design Structural systems Concretes Structures Design Reinforced concrete Prestressed concrete Precast concrete Factor of safety Durability Design calculations Prestressing steels Structural members Fire resistance Construction materials Safety measures Approval testing Serviceability limits Tendons Reinforcement Lightweight aggregates Aggregates **Designers' Handbook to Eurocode 2** A. W. Beeby,R. S. Narayanan,1995 This handbook aims to assist designers to apply Eurocode 2 by explaining the background to and the intention of the provisions indicating the most convenient design approaches comparing the provisions with those in BS 8110 presenting design aids charts and examples **Design of Prestressed Concrete to Eurocode 2** Raymond Ian Gilbert,Neil Colin Mickleborough,Gianluca Ranzi,2017-01-27 The design of structures in general and prestressed concrete structures in particular requires considerably more information than is contained in building codes A sound understanding of structural behaviour at all stages of loading is essential This textbook presents a detailed description and explanation of the behaviour of prestressed concrete members and structures both at service loads and at ultimate loads and in doing so provide a comprehensive and up to date guide to structural design Much of the text is based on first principles and relies only on the principles of mechanics and the properties of concrete and steel with numerous worked examples However where the design requirements are code specific this book refers to the provisions of Eurocode 2 Design of Concrete Structures and where possible the notation is the same as in Eurocode 2 A parallel volume is written to the Australian Standard for Concrete Structures AS3600 2009 The text runs from an introduction to the fundamentals to in depth treatments of more advanced topics in modern prestressed concrete structures It suits senior undergraduate and graduate students and also practising engineers who want comprehensive introduction to the design of prestressed concrete structures It retains the clear and concise explanations and the easy to read style of the first edition but the content has been extensively re organised and considerably expanded and updated New chapters cover design procedures actions and loads prestressing systems and construction requirements connections and detailing and design concepts for prestressed concrete bridges The topic of serviceability is developed extensively throughout All the authors have been researching and teaching the behaviour and design of prestressed concrete structures for over thirty five years and the proposed new edition of the book reflects this wealth of experience The work has also gained much from Professor Gilbert active and long time involvement in the development of standards for concrete buildings and concrete bridges

Modernisation, Mechanisation and Industrialisation of Concrete Structures Kim S. Elliott,Zuhairi Abd. Hamid,2017-05-01 Modernisation Mechanisation and Industrialisation of Concrete Structures discusses the manufacture of high quality

prefabricated concrete construction components and how that can be achieved through the application of developments in concrete technology information modelling and best practice in design and manufacturing techniques
