(Indian Economic Development) (Chapter – 7) (Employment: Growth, Informalisation and other Issues)
(Class – XII)

Question 20:

You are residing in a village. If you are asked to advise the village panchayat, what kinds of activities would you suggest for the improvement of your village which would also generate employment

Answer 20:

The following are the suggestions that can generate employment opportunities in village:

- **Increase Production:** It is of prime importance to increase production in the agricultural and industrial sectors in order to increase employment. For this purpose, small scale and cottage industries should be promoted. This will not only generate new employment opportunities but also assist the industrial sector, as the production of the small scale and cottage industries act as subsidiaries to the industrial sector.
- **Increase Productivity:** The demand and productivity for labour are directly related to each other. The higher productivity generates higher profits that in turn implies higher investment and generates higher demand for labour. Rural workers should be imparted technical knowledge and modern knowhow that will not only increase their productivity but also enhance their acceptability of modernization.
- **Control over Population:** Population explosion is one of the important concerns for India. It hinders economic growth prospects. The rising population leads to the rise in unemployment and, therefore, poverty. Thus, rural people should be made aware of various birth control measures and also the benefits associated with family planning and nuclear-family.
- **Creating Non-agricultural Employment:** India being an agrarian economy employs a major proportion of workforce in the agricultural sector. The development of this sector is still a far cry and, consequently, suffers from disguised unemployment. Moreover, as agriculture is a seasonal occupation, so, many farmers remain unemployed for three to four months in a year. Thus, it is necessary to engage these people in non-agricultural sectors for the phase they are off from cultivation. Creation of non-agricultural job like pottery, handicrafts, not only reduces disguised unemployment but also contributes to enhanced income to the farmers in the off-season, which could be invested in the farm to improve farm productivity and farm products.
- **Easy Credit and Finance:** Often, the rural people find it difficult to access finance due to the lack of sufficient financial institutions in the rural areas. Even if the finance or the credit is available, then this is provided at higher lending rates. The lack of credit acts as a bottleneck for the rural growth. Thus, financial institutions and banks should be set up to provide easy credit to the rural people.
- **Education and Health Facilities:** Rural areas have always lagged behind in education and health care facilities. This not only impedes their productivity but also reduces their life expectancy and quality of standard of living. Along with primary and secondary schools, night schools for adults, imparting technical education and technical know-how, proper sanitation and hospitals should be established in the rural areas.

Question 21:

Who is a casual wage labourer?

Answer 21:

Casual workers refer to those workers who do not work throughout the year. They only work for few months. Casual workers are not hired by employers on a regular basis. They do not enjoy social security benefits like provident fund, gratuity, etc. They are generally unskilled workers. For example: workers working at a construction site.
