1/7The World of Project Management

## Chapter 1 The World of Project Management

---

This chapter introduces the topic of project management. Projects are defined as temporary endeavors undertaken to create a unique product or service. The chapter points out that recent interest in project management is based on a recognition that many organizational tasks do not fit neatly into business-as-usual. The significant differences between project management and general management are overviewed. The chapter points out that the two primary roles of the project manager are managing trade-offs among the three interrelated project objectives and managing risk. The three interrelated objectives of budget, schedule, and specifications are also introduced. In addition, two alternative project life cycles are presented and the importance of understanding this distinction is discussed. Also included in the chapter is a discussion of project selection including both non-numeric and numeric selection methods. Section 1.3 has been added to introduce Agile Project Management (APM). Included in this section are discussions of why APM was developed, the Agile Manifesto and 12 Agile Principles, and an introduction to scrums. The chapter concludes with a discussion of the aggregate project plan and an overview of the organization of the remainder of the text.

### Cases and Readings

*Some cases appropriate to the subject of this chapter are:*

**Harvard 9-688-040 Boeing 767: From Concept to Production (A); 9-688-041 (B) 9-688-519 Videotape.** This 19 page best-selling case shows how a massive corporation manages the evolution of an enormously complex and risky project from conception to manufacture. The 1-page B case is a supplement update about whether Boeing needs to change the way they manage such projects. The video shows the assembly process of an airplane, compressing 10 weeks of work into ten minutes. Good introductory case to the idea of large-scale projects. An 18 page teaching note is available for this case (9-689-027).

**Harvard 9-396-311 BAE Automated System (A); Denver International Airport Baggage-Handling System.** This 15-page case describes the difficult, continuously-delayed Denver airport project from the viewpoint of one of the contractors. Includes issues of budgeting, scheduling, planning, contracting, and other managerial aspects of this large project. There is also a (B) case, described in Chapter 7, Monitoring and Controlling the Project. A 12-page teaching note is available for this case (9-399-099).

**Harvard 9-692-083 BMW: The 7-Series Project (A); 9-695-003 (B).** This 20-page best-selling case describes the situation of a manufacturer with a high-quality product trying to select among two processes for producing its new model. The proposed project for initiating a new production process promises to eliminate start-up production problems and improve quality
