Astrolabes in Medieval Cultures ,2019-01-28 First published as a special issue of the journal *Medieval Encounters* vol 23 2017 this volume edited by Josefina Rodr guez Arribas Charles Burnett Silke Ackermann and Ryan Szpiech brings together fifteen studies on various aspects of the astrolabe in medieval cultures The astrolabe developed in antiquity and elaborated throughout the Middle Ages was used for calculation teaching and observation and also served astrological and medical purposes It was the most popular and prestigious of the mathematical instruments and was found equally among practitioners of various sciences and arts as among princes in royal courts By considering sources and instruments from Muslim Christian and Jewish contexts this volume provides state of the art research on the history and use of the astrolabe throughout the Middle Ages Contributors are Silke Ackermann Emilia Calvo John Davis Laura Fern ndez Fern ndez Miquel Forcada Azucena Hern ndez David A King Taro Mimura G nther Oestmann Josefina Rodr guez Arribas Sreeramula Rajeswara Sarma Petra G Schmidl Giorgio Strano Flora Vafea and Johannes Thomann *A Treatise on the Astrolabe* Geoffrey Chaucer,1872 **The School News and Practical Educator** ,1913 *Comprehension of Graphics* W. Schnotz,R.W. Kulhavy,1994-08-01 Graphic displays such as charts graphs diagrams and maps play in important role today in the design and presentation of instructional materials education There is also a strong need in scientific technical and administrative fields to visually present facts laws principles etc The increasing use of computer based learning environments has also become an important field where the visual presentation of information plays a central role Despite the importance of graphical displays as a means of communication and the fact that research about learning and cognition has advanced rapidly in the past two decades the comprehension of graphics is still a rather unexplored area The comprehension of graphics is not only a stimulating topic in the fields of science and instructional psychology but also in related disciplines such as semiotics and artificial intelligence Research on the comprehension of graphics complements the scientific investigation of cognitive processes in text comprehension which has contributed much to our understanding of human cognition and learning Ultimately a better understanding of the cognitive processes involved in the comprehension of graphics will have an impact not only on cognitive theory but also on educational practice **Journal of the Sanitary Institute** Sanitary Institute (Great Britain),1895 **Dialect Notes** ,1928 *Advanced Arithmetic* Elmer Adelbert Lyman,1905 Supreme Court , Popular Astronomy ,1917
