Pandas for Everyone Daniel Y. Chen, 2017 The Hands-On Example Rich Introduction to Pandas Data Analysis in Python. Today analysts must manage data characterized by extraordinary variety, velocity, and volume. Using the open-source Pandas library, you can use Python to rapidly automate and perform virtually any data analysis task, no matter how large or complex. Pandas can help you ensure the veracity of your data, visualize it for effective decision making, and reliably reproduce analyses across multiple datasets. Pandas for Everyone brings together practical knowledge and insight for solving real problems with Pandas, even if you're new to Python data analysis. Daniel Y. Chen introduces key concepts through simple but practical examples, incrementally building on them to solve more difficult real-world problems. Chen gives you a jumpstart on using Pandas with a realistic dataset and covers combining datasets, handling missing data, and structuring datasets for easier analysis and visualization. He demonstrates powerful data cleaning techniques, from basic string manipulation to applying functions simultaneously across dataframes. Once your data is ready, Chen guides you through fitting models for prediction, clustering, inference, and exploration. He provides tips on performance and scalability and introduces you to the wider Python data analysis ecosystem. Work with DataFrames and Series and import or export data. Create plots with

matplotlib seaborn and pandas Combine datasets and handle missing data Reshape tidy and clean datasets so they re easier to work with Convert data types and manipulate text strings Apply functions to scale data manipulations Aggregate transform and filter large datasets with groupby Leverage Pandas advanced date and time capabilities Fit linear models using statsmodels and scikit learn libraries Use generalized linear modeling to fit models with different response variables Compare multiple models to select the best Regularize to overcome overfitting and improve performance Use clustering in unsupervised machine learning Register your product at informit.com register for convenient access to downloads updates and or corrections as they become available
