context in which they must work With the explosion of the Internet and major changes to the field with the introduction of the new Data Protection Act and the legal status of software engineers it is now essential that they have an appreciation of a wide variety of issues outside the technical Equally valuable to both students and practitioners it brings together the expertise and experience of leading academics in software engineering law industrial relations and health and safety explaining the central principles and issues in each field and shows how they apply to software engineering

The Responsible Software Engineer Colin Myers, Tracy Hall, Dave Pitt, 2012-12-06 You might expect that a person invited to contribute a foreword to a book on the 1 subject of professionalism would himself be a professional of exemplary standing I am gladdened by that thought but also disquieted The disquieting part of it is that if I am a professional I must be a professional something but what As someone who has tried his best for the last thirty years to avoid doing anything twice I lack one of the most important characteristics of a professional the dedicated and persistent pursuit of a single direction For the purposes of this foreword it would be handy if I could think of myself as a professional abstractor That would allow me to offer up a few useful abstractions about professionalism patterns that might illuminate the essays that follow I shall try to do this by proposing three successively more complex models of professionalism ending up with one that is uncomfortably soft but still the best approximation I can make of what the word means to me The first of these models I shall designate Model Zero I intend a pejorative sense to this name since the attitude represented by Model Zero is retrograde and offensive but nonetheless common In this model the word professionalism is a simple surrogate for compliant uniformity
