Performing Ground L. Levin, 2014-07-31 *Performing Ground* explores camouflage as a performance practice arguing that the act of blending into one's environment is central to the ways we negotiate our identities through space. The book offers a critically rich investigation of how the performative practice of camouflage renders the politics of space, power, and gender in visible.

**German Façade Design** Randall Ott, 2016-09-17 German architecture prior to the modern period has received less systemic analytical study than that of Italy, France, and Britain. Scholarly discussion of broad traditions or continuities within Germanic or Central European facade design is even sparser. Baroque era studies of the region mostly devote themselves to isolated architects, monuments, or movements. Modernism's advent decisively changed this Germanic architecture, which enjoyed sudden ascendancy. Yet even so, study specifically of that region's facades still lagged, nothing compares to the dozens of treatments of Le Corbusier's facade systems, for example, and how these juxtapose with French neoclassical or Italian Renaissance methods. Given the paucity of multi-period studies, one can be forgiven for believing Germany's effervescence of radical modern works seems unprecedented. This book takes up these multiple quandaries. It identifies and documents a previously unrecognized compositional tradition, characterized here as the screen facade, and posits it as a counter-narrative critiquing the essentialist, authentic canon currently dominant in Western architectural history. By crossing evenly over the dividing line between the historical and modern periods, it offers valuable insights on indigenous roots underlying some aspects of Germany's invigorating early twentieth-century architectural developments. The book chronologically examines 400 years of closely related facades concentrated in Germany but also found in Austria, the Czech Republic, German-speaking Switzerland, and nearby areas of Central Europe. While nearly 75 buildings are mentioned and illustrated, a dozen are given extensive analysis, and the book focuses on the works of three architects: Schinkel, Behrens, and Mies. Relationships between examples of these three architects' facades far transcend mere homage amongst masters. Glimmers of the system they eventually codify are apparent as early as at Heidelberg Castle in 1559 and Nürnberg's Rathaus in 1622. The book argues that in Germany, northern Gothic affinities for bisection, intense repetition, and rote aggregation intersected with southern Classical affinities for symmetry, hierarchy, and centrality, thereby spawning a unique hybrid product: the screen. Instead of graphic formality, this study is guided by on-site perceptions, propositional contrasts, means of approach, interpretive conflicts, and emotion, and it relates the design of these facades to concepts proposed by contemporary philosophers including Novalis, Hegel, Nietzsche, Freud, Adorno, and most importantly, Gadamer on hermeneutics.

*Crafting Anatomies* Katherine Townsend, Rhian Solomon, Amanda Briggs-Goode, 2020-02-20 The human body lies at the centre of our relationship to fashion and textiles. *Crafting Anatomies* explores how the body has become a catalyst for archival research, creative dialogues, and hybrid fabrications in fashion design. Focusing on how our response to the corporeal has shifted over time, the book looks at how it is currently influencing design and socio-material practices. With contributions from a

multidisciplinary range of scholars and researchers *Crafting Anatomies* examines how new technologies have become integrated with traditional fashion and textiles techniques bringing together art science and biomedical approaches Traversing the cutting edge of design research the chapters take us from the forgotten lives of historical garments to the potential of biofabrication to cross the boundaries between skin and textile Illustrated with 120 images visualising original research the book reveals how the human body continues to inspire future design from historical wearables to prosthetic limbs and 3D printed footwear In doing so it provides an inspiring account of how fashion and textile culture now impacts socio creativity and the formation of contemporary identity
