

## *Polysynthetic languages.*

- **Polysynthetic Languages:** These languages are undoubtedly some of the most difficult to learn.
- Polysynthetic languages often display a high degree of affixation (high number of morphemes per word) and fusion of morphemes.
- They often have verbs that can express the entirety of a typical sentence in English, which they do by incorporating nouns into verbs forms. For example, the Sora language of India has one word that means "I will catch a tiger". Many Native American languages are polysynthetic.
