

Argyle

- Michael Argyle (1925 – 2002) was a Social Psychologist who researched and developed the theories about human communication and interpersonal interaction. Argyle proposed that communication is a skill which needs to be learnt and practiced like any other skill.
- He looked at both verbal and non-verbal communication.
- His experimental research was to develop the theoretical image which became the Communication Cycle theory.
- Argyle in (1967) claimed that human communication is essentially a two way process that involves people sending, receiving and responding to each others non-verbal and verbal messages.
