considerable lack of ethnoarchaeological studies explicitly focused on the less tangible evidence of present and past societies Fresh case studies will revitalize the theoretical debate around ethnoarchaeology and its applicability in the archaeological and heritage research in the new millennium Over the past decade intangible has become a key word in anthropological research and in heritage management Archaeological theories and methods regarding the explorations of the meaning and the significance of artifacts resources and settlement patterns are increasingly focusing on non material evidence Due to its peculiar characteristics ethnoarchaeology can effectively foster the development of the study of the intangible cultural heritage of living societies and highlight its relevance to the study of those of the past *Baal*, 2006 **Trübner's Bibliographical Catalogues** Kegan Paul, Trench, Trubner & Co, 1925 **Mellanges de l'Universite Saint-joseph** Université Saint-Joseph (Beirut, Lebanon), 1975 Ecology of Cyanobacteria II Brian A.
