Phylogenomic Discordance in Plant Systematics Stefan Wanke, Susann Wicke, 2023-11-15 Phylogenetics often uncovers contradicting hypotheses regarding the relationships within the same group of organisms a phenomenon known since the beginning of the molecular systematics era While historically single marker based analyses produced discordance nowadays entire cellular genomes or portions of the same genomic compartment conflict with others or the rest respectively In contrast to the beginning of the molecular systematics era when adding markers and taxa offered a way out of systematic errors genome inference based incongruences cannot be addressed and explained easily Disagreeing phylogenomic hypotheses might originate from various evolutionary processes including but not limited to hybridization or incomplete lineage sorting thereby leading to gene tree versus species tree associated discrepancies Today this can be expanded to genome discordance where phylogenomic signals of organellar genomes plastid mitochondrial and the nuclear genome disagree due to intrinsically different coalescent paths or phenomena like organelle capture *Pollination and evolution*

Plants on Plants - The Biology of Vascular Epiphytes Gerhard

Zotz, 2016-09-01 This book critically reviews advances in our understanding of the biology of vascular epiphytes since Andreas Schimper's 1888 seminal work It addresses all aspects of their biology from anatomy and physiology to ecology and evolution in the context of general biological principles By comparing epiphytes with non epiphytes throughout it offers a valuable resource for researchers in plant sciences and related disciplines A particular strength is the identification of research areas that have not received the attention they deserve with conservation being a case in point Scientists have tended to study pristine systems but global developments call for information on epiphytes in human disturbed systems and the response of epiphytes to global climate change **Natural Products and Medicinal Properties of Carpathian**
