1. Based on the grid below, identify each function below as being a linear or a non-linear function.

2. Identify each of the functions below that are **linear**. If they are linear, write the equation of the function. If they are **non-linear**, write the equation of the curve.

This is being presented with the grid for the same reason.

3. Graph each of the functions part 2 on the grid below and label each with its equation if it is linear or its equation if it is non-linear. If it is non-linear, identify the type of curve.

Remember, the functions that are **linear** are straight lines. The functions that are **non-linear** are curves.
