Whitaker's Books in Print ,1998 *Indian National Bibliography* B. S. Kesavan,2012-05 **The Emerging Domain of Cooperating Objects** Pedro José Marron,Stamatis Karnouskos,Daniel Minder,Aníbal Ollero,2011-01-19 There are a number of different system concepts that have gained much relevance in the area of embedded systems over the past couple of years First there is the classic concept of embedded systems where the focus is on control systems for physical processes Secondly the notion of pervasive computing has evolved where the vision foresees everyday objects having some form of computation capacity and in most cases sensing and communication facilities Thirdly the notion of wireless sensor networks has arisen where small computing devices are able to sense their environment and cooperate in order to achieve a well defined goal These three types of quite diverse systems share a lot of commonalities on the one hand and on the other hand have some complementary aspects in common that make a combination of these systems into a coherent system vision promising In particular the important notions of control heterogeneity wireless communication dynamic and ad hoc nature and cost are prevalent to various degrees in each of these systems A future system concept needs to combine the strong points of all three system concepts in at least these functional aspects It has to provide support for the control of physical processes like today s embedded systems do have as good support for device heterogeneity and spontaneity of usage as required by pervasive and ubiquitous computing approaches and has to be as cost efficient and wirelessly agile as wireless sensor networks are These new systems consist therefore of individual entities or objects that jointly strive to reach a common goal which will typically be a goal in sensing or control and are dynamically and loosely federating themselves for cooperation taking care not to overtax their available resources This book presents a roadmap to these concepts which are summarized as cooperating objects Dissertation Abstracts International ,2000 **The British National Bibliography** Arthur James Wells,2004

Competition Law and Regulation of the EU Electronic Communications Sector Liyang Hou,2012-09-01 This book brings satisfying definition and clarity to this field at last Exploring the substantive differences between competition law and sector specific regulation after the methodological integration it presents the first detailed analysis of the many hundreds of notifications and Commission letters generated under the Article 7 procedure identifying the most relevant cases dealing with market definition market power and remedies It compares these decisions with relevant competition law cases and highlights elements with a bearing on sector specific regulation It also offers hugely valuable guidance through the vast amount of documents in the Commission s CIRCA database Topics and issues raised include the following definition of product markets delineation of geographic markets including sub national different practices in relation to assessing single market power and collective market power and competition problems such as refusal to deal margin squeeze non price discrimination and excessive pricing There can be little doubt that this is the new reference point for researchers and practitioners in this domain By systematically categorizing the concepts and legal criteria and building a solid theoretical

framework on the intersection of competition law and sector specific regulation the author has created a resource that is sure to be welcomed by all those involved in regulation of electronic communications markets and network industries in general academic scholars telecommunications regulators at the EU and Member State levels competition authorities law firms specializing in IT communications law practitioners in IT and telecommunications companies and consultants in the sector The book will also prove very useful for scholars and practitioners in other parts of the world interested in comparing the EU system with their own
