but you're worried it will take too long. Would you like to automate something simple with your PC but you don't know how to do it? Or maybe you know other programming languages and are interested in learning Python quickly. As a beginner, you might think that programming is difficult and the possibility to give up before mastering it could be high. So if you have a project to develop, you could think on hiring a programmer to shorten the time. This may seem like a good idea, but it is certainly very expensive. Otherwise, you could waste your time pursuing tutorials online. The best solution is to follow a complete programming manual with hands-on projects and practical exercises. What you will find inside and a quick overview of the main topics.

**Why Python is considered the best programming language for a beginner**

The most common mistakes to avoid when you start programming
