

### **Filter Separators API/IP 1581 5<sup>th</sup> Edition**

At a recent industry meeting it was agreed that there is a need for some guidance related to the implementation of the latest edition of API/IP 1581.

**This Bulletin is valid with immediate effect but the following key dates should be noted:**

- a) New filter separator vessel purchases shall be specified for 5<sup>th</sup> edition compliance with immediate effect (see item (1) on page 2 for guidance).
- b) Installed 3<sup>rd</sup> edition coalescer elements can continue in service until replacement is required, due to maximum differential pressure or 3 years, but subject to a final change-out date of **June 30, 2008**.
- c) Purchased stocks of 3<sup>rd</sup> edition coalescer elements can be used for replacement purposes until **June 30, 2006**, but subject to a final change-out date of **June 30, 2008**.

At Joint Venture airport locations, any variation of the above dates requires the approval of the international head offices of the participant companies.

#### **Background**

The need to update the 3<sup>rd</sup> edition of API/IP Specification 1581 was identified in the mid 1990s and resulted in the preparation of the 4<sup>th</sup> edition which was published in January 2000 with an effective date of January 2002.

Problems with the specification for the test fuel and particularly for one of the additives required for the qualification procedure led to the effective date for the 4<sup>th</sup> edition being extended to July 31 2003 with 3<sup>rd</sup> edition remaining the "current edition" until that date.

At an API/IP meeting in October 2001 it was agreed to develop a 5<sup>th</sup> edition to replace both 3<sup>rd</sup> and 4<sup>th</sup> editions with an effective date of July 2003.

#### **API 1581 5<sup>th</sup> edition qualification procedures**

API/IP Specification 1581 5<sup>th</sup> edition was published in July 2002. The 5<sup>th</sup> edition refers to recognising the previous edition for one year after publication (ie. until July 2003) but, because of the improved filtration performance, recommends that 5<sup>th</sup> edition elements be qualified and offered as soon as practical.

The qualification of 5<sup>th</sup> edition elements is taking longer than expected. However, some elements manufactured to meet the requirements of 5<sup>th</sup> edition with witness testing by industry approved inspectors are now available from the manufacturers and it is expected that a full range of the commonly used element types will be available later this year.
