Diffusion Equation

$$(0 =) \frac{\partial \nu(\mathbf{x})}{\partial t} = D \Delta \nu(\mathbf{x}) + \rho(x)$$

$$\rho(\mathbf{x}) = \frac{1}{T_{MC}} \sum_{i}^{N_{TH}} \delta^3(\mathbf{x} - \mathbf{x}_i)$$

Boundary Condition: $\quad \nu(\mathbf{x}_B) = 0$

Arrival # of particles per unit area, during T_{MC} is:

$$F_{Th} = T_{MC} D \frac{\partial}{\partial n} \nu(\mathbf{x}_B) \quad \left(\frac{\partial}{\partial n} \equiv \mathbf{n} \cdot \mathrm{grad} \right)$$

Goldberg,2002-09 In this thesis we develop a numerical method in order to approximate the solutions of one dimensional non linear absorption diffusion equations We test our method for accuracy against a linear diffusion equation with a solution that can be written in closed form We then test various types of diffusion and absorption terms to determine which ones produce extinction in finite time We also develop a numerical method to computationally solve diffusion free equations We compare the numerical solutions of

the one dimensional non linear absorption diffusion equation and the diffusion free equation and we find that for the cases tested the numerical absorption diffusion solutions are always less than the numerical diffusion free solutions Furthermore we find this is true for the cases tested when there is finite and infinite extinction time We also look at the open problem where we have slow diffusion and weak absorption but their combined effect is strong Our results provide some insight into the answer of this problem **Methods of Mathematical Modelling** Harendra Singh,Devendra Kumar,Dumitru Baleanu,2019-09-17 This book features original research articles on the topic of mathematical modelling and fractional differential equations The contributions written by leading researchers in the field consist of chapters on classical and modern dynamical systems modelled by fractional differential equations in physics engineering signal processing fluid mechanics and bioengineering manufacturing systems engineering and project management The book offers theory and practical applications for the solutions of real life problems and will be of interest to graduate level students educators researchers and scientists interested in mathematical modelling and its diverse applications Features Presents several recent developments in the theory and applications of fractional calculus Includes chapters on different analytical and numerical methods dedicated to several mathematical equations Develops methods for the mathematical models which are governed by fractional differential equations Provides methods for models in physics engineering signal processing fluid mechanics and bioengineering Discusses real world problems theory and applications *Frontiers in Fractional Calculus* Sachin Bhalekar,2018-03-21 This book brings together eleven topics on different aspects of fractional calculus in a single volume It provides readers the basic knowledge of fractional calculus and introduces advanced topics and applications The information in the book is presented in four parts 1 Fractional Diffusion Equations i solutions of fractional diffusion equations using wavelet methods ii the maximum principle for time fractional diffusion equations iii nonlinear sub diffusion equations 2 Mathematical Analysis i shifted Jacobi polynomials for solving and identifying coupled fractional delay differential equations ii the monotone iteration principle in the theory of Hadamard fractional delay differential equations iii dynamics of fractional order modified Bhalekar Gejji System iv Grunwald Letnikov derivatives 3 Computational Techniques GPU computing of special mathematical functions used in fractional calculus 4 Reviews i the popular iterative method NIM ii fractional derivative with non singular kernels iii some open problems in fractional order nonlinear system This is a useful reference for researchers and graduate level mathematics students seeking knowledge about of fractional calculus and applied mathematics Advances in Mathematical Modelling, Applied Analysis and Computation Jagdev Singh,George A.
