Catalano, 2015-09-28 If you are a librarian charged with collecting curriculum materials and children's literature to support the Common Core State Standards then this book the only one that offers explicit advice on collection development in curriculum collections is for you While there are many publications on the Common Core for school librarians and K 12 educators no such literature exists for curriculum librarians at the post secondary level This book fills that gap standing alone as a guide to collection development for curriculum librarians independent of the Common Core State Standards CCSS The book provides instruction and guidance to curriculum librarians who acquire and manage collections so you can develop a collection based on best practices The book begins with a primer on the CCSS and how curriculum librarians can support them Discussion of the Standards is then woven through chapters arranged by content area that share research based practices in curriculum development and instruction to guide you in curriculum selection Material types covered include games textbooks children's literature primary sources counseling and nonfiction Additional chapters cover the management of curriculum collections testing collections and instruction and reference as well as how to support and collect for special needs learners Current practices in collection development for curriculum materials librarians are also reviewed The book closes with a discussion of the future of curriculum materials Reducing School Shootings William H. Jaynes, 2021-02-01 This book calls for a multidimensional and comprehensive approach to reduce the number of school shootings rather than the simplistic unidimensional strategy that is commonly advocated Based on meta analyses examining which variables are most often related to positive changes in violent student behavior it also integrates other research and historical trends in order to formulate recommendations regarding how to reduce school shootings The topic of school shootings is one of the most vital issues in society today because 1 schools should be the safest places on Earth for children 2 if students do not feel safe they are not going to learn very well in school and 3 it is of such great concern to parents and society at large as evinced by the degree of news coverage that school shooting incidents receive Sadly despite the gravity of the problem many people tend to either respond in an emotional way or propose simplistic solutions Gun control legislation alone will not solve the problem instead it calls for a multi disciplinary and multifaceted approach involving parents teachers schools and healthcare This book investigates the status quo goals and solutions pursuing a fact based approach This book is of special interest to the academic community national leaders and other policymakers It is also suitable for courses on education psychology sociology criminal justice and other areas of law It will also appeal to the general audience *I2010*, 2006 Recogee 1 independence and ageing 2 Ageing in european society a snapshot 3 Understanding the needs of older people 4 Innovation for health well being and independent living 5 Living independently 6 Keeping healthy 7 Remaining active 8 Staying longer at
