frames this classic work with a new introduction a new epilogue and extensive notes added to the original text Turkle talks to children college students engineers AI scientists hackers and personal computer owners people confronting machines that seem to think and at the same time suggest a new way for us to think about human thought emotion memory and understanding Her interviews reveal that we experience computers as being on the border between inanimate and animate as both an extension of the self and part of the external world Their special place betwixt and between traditional categories is part of what makes them compelling and evocative In the introduction to this edition Turkle quotes a PDA user as saying When my Palm crashed it was like a death I thought I had lost my mind Why we think of the workings of a machine in psychological terms how this happens and what it means for all of us is the ever more timely subject of *The Second Self*
