Ensnared between Hitler and Stalin David K Zimmerman,2022-12-21 In the 1930s hundreds of scientists and scholars fled Hitler s Germany Many found safety but some made the disastrous decision to seek refuge in Stalin s Soviet Union The vast majority of these refugee scholars were arrested murdered or forced to flee the Soviet Union during the Great Terror Many of the survivors then found themselves embroiled in the Holocaust Ensnared between Hitler and Stalin explores the forced migration of these displaced academics from Nazi Germany to the Soviet Union The book follows the lives of thirty six scholars through some of the most tumultuous events of the twentieth century It reveals that not only did they endure the chaos that engulfed central Europe in the decades before Hitler came to power but they were also caught up in two of the greatest mass murders in history David Zimmerman examines how those fleeing Hitler in their quests for safe harbour faced hardship and grave danger including arrest torture and execution by the Soviet state Drawing on German Russian and English sources Ensnared between Hitler and Stalin illustrates the complex paths taken by refugee scholars in flight

Shield Down William de Berg,2020-01-07 SGR 0245 05 a dangerous magnetar within close galactic proximity shows signs of erupting just as the Earth is in a magnetic reversal and losing its magnetic shield Professor James Templeton a brilliant but maligned astrophysicist who alone predicted the eruption of 05 is summoned to Washington DC by Dr Jacqueline DeFazio his former lover and head of NASA s Space Life Sciences Division to consult with high ranking governmental officials about the prospects for a major starquake in 05 He tours one of over one hundred American underground mini cities that were built in the preceding decade based on his scientific predictions and is astounded by the realization that NASA and Dr DeFazio were following up massively on his predictions of doom even as they were attacking him in public The magnetar strikes almost immediately after the high level briefing and before he and DeFazio can reignite their relationship Templeton is trapped in DC but manages to return home after a harrowing cross country trip across a dystopian America in the initial stages of societal collapse After two hundred years the

restoration of the magnetic shield leads a small number of underground survivors to eventually resurface to a feudal world of warring tribes

Optical Technology Transfer and Innovation in Ophthalmic Imaging Barry R. Masters, 2025-10-30

This book presents a new view of symbiotic technology transfer between different fields in the optical sciences. For example, adaptive optics were initially developed for military research programs seeking to correct the effects of atmospheric fluctuations on telescopes. The technology was subsequently transferred to optical microscopes and then finally used in ophthalmic imaging devices to image photoreceptors in the living human retina. This book examines various recent and historical technology transfers among the optical sciences and attempts to answer the following questions: What are the mathematical and the physical foundations of these technology advances? What events and influences, military requirements, new journals, new funding sources, the internet, etc., made the technologies and their transfer possible? What was the impact of technology transfer on the development of optical science? What role did the human eye and visual system play in technology development? This book examines how innovations propagate from one field to another, illustrating the benefits of cross-disciplinary collaboration. This book is about curiosity, skepticism, innovation, and creativity in science and technology and explores practices that advance innovation and those that inhibit innovation. Analyses of some selected pertinent case studies highlight the roles of unique individuals who were able to make the journey from initial concept to widespread clinical acceptance of their instruments. What are the common factors of their education, experiences, and approaches that resulted in their inventions and innovations? This book is intended to inspire and encourage those who dream of advancing the diagnostics and the treatment of diseases through new medical devices. It also addresses budding startup dreamers, venture capitalists, research directors, and funding agency administrators by providing new insights into practices that promote and inhibit innovation. This book should be of interest to scientists and researchers in many fields of optics, as well as technical policy makers at funding institutions.
