Survey of Text Mining Michael W. Berry,2013-03-14 Extracting content from text continues to be an important research problem for information processing and management Approaches to capture the semantics of text based document collections may be based on Bayesian models probability theory vector space models statistical models or even graph theory As the volume of digitized textual media continues to grow so does the need for designing robust scalable indexing and search strategies software to meet a variety of user needs Knowledge extraction or creation from text requires systematic yet reliable processing that can be codified and adapted for changing needs and environments This book will draw upon experts in both academia and industry to recommend practical approaches to the purification indexing and mining of textual information It will address document identification clustering and categorizing documents cleaning text and visualizing semantic models of text   Survey Of Text Mining: Clustering, Classification, And Retrieval Berry Michael W.,2007-01-01
