Advances in Superconductivity VII Kaoru Yamafuji, Tadataka Morishita, 2012-12-06 The field of high temperature superconductivity has encouraged an inter disciplinary approach to research It has required significant cooperation and collaboration among researchers each of whom has brought to it a rich variety of experience from many other fields Recently great improvements have been made in the quality of research The subject has matured and been launched into the next stage through the resonance between science and technology The current progress of materials processing and engineering in this field is analogous to that previously seen in the development of semiconductors These include the appearance of materials taking the place of YBa₂Cu₃O₇ owing to their improved properties higher critical temperatures and stronger flux pinning in which rare earth ions with large radii La Nd Sm substitute for Y the development of technology enabling growth control on the nanometer scale and precise and reproducible measurements that can be used as rigorous tests of theoretical models which in turn are expected to lead to the development of new devices For further progress in high T research academics and technologists must pool their knowledge and experience I hope that this volume will promote that goal by providing the reader with the latest results of high temperature superconductor research and will stimulate further discussion and collaboration

The Garden of Reality contemplates the relativity of religious truth religious pluralism transreligious discourse postmodern cosmology and multireligious mysticism Its transreligious approach aims at a future multireligious peaceful society in an ecological and cosmic context It proposes that the future of humanity is bound to conviviality with itself and the Earth that the deepest religious motivations of existing together are relative to one another and that transreligious relativity is essential to the conviction of religions that their motivations experiences and conceptualities are meaningful real and true By engaging diverse voices from poststructuralism to Sufism Dzogchen and philosophical Daoism from conceptual frameworks of Christianity and Hinduism to mystical and postmodern cosmology current cosmopolitanism and interreligious and interspiritual discourses but especially understudied contributions of process thought and the Bah religion this book suggests that multireligious conviviality must listen to the universal relevance of a multiplicity of minority voices Its polyphilic pluralism affirms the mutual immanence and co creative nature of religions and spiritualities with the universal in sistance of divine or ultimate reality in the cosmos Embracing a relativistic and evolutionary paradigm in an infinite cosmos of creative becoming religions must cope with events of novelty that disturb and connect transcend and contrast the continuum of their truth claims but must avoid conflict as religious diversity is enveloped by an ever folding landscape of ultimate reality **Progress in Optics: A Tribute to Emil Wolf**
