Vigilance Is Not Enough Mark M. Lowenthal, 2025-05-06 A broad and deep survey of American intelligence from before the Revolution to the present Every nation has an intelligence apparatus some means by which its top officials acquire needed information on sensitive issues But each nation does it differently influenced by its history its geographical conditions and its political traditions In this book Mark M Lowenthal examines the development of U S intelligence to explain how and why the United States went from having no intelligence service to speak of to being the world's predominant intelligence power almost overnight and he discusses the difficult choices involved in maintaining that dominance in a liberal democracy Lowenthal describes how the lack of a tradition of spycraft both hindered and helped American efforts to develop intelligence services during and after the Second World War He points to the political pragmatism leading to difficult choices with which most intelligence directors operated the constant tension between security and civil liberties in a constitutional democracy the tension between the need for secrecy and the accountability required for democratic governance and the way the growing importance of technology changed both the methods and the objectives of intelligence gathering Far more than simply an episodic history this book offers an analysis of why American intelligence developed as it did and what it has meant for the nation's and the world's politics

Human Rights and Environmental Protection Marek Prityi, 2024-11-15 This book explores the complex relationship between human rights and environmental protection. It analyzes the concept of environmental procedural rights from a comparative perspective in the European Union, India, and China. Arguing the need to apply a holistic approach which acknowledges the interlinkages between democracy, environmental protection, and climate change, it examines both theoretical and practical dimensions of the topic with case studies drawn from empirical research. The work highlights the important role of environmental procedural rights at the intersection of environmental law and human rights, emphasizing the need for effective channels of communication between citizens and public authorities. The study calls for the taking into account of non-binding recommendations such as the Maastricht Recommendations on Promoting Effective Public Participation in Environmental Matters for developing public participation procedures in a manner that allows authorities to tailor these to the needs and situations of marginalized people. The book will be a valuable resource for academics, researchers, and policy makers working in the areas of environmental law, international human rights law, and transnational law and governance.
