Novices as well as seasoned quality professionals will find *The Quality Improvement Glossary* to be the definitive source for quality-related terms, concepts, persons, and acronyms, making it an invaluable addition to any quality library. for elderly people Edward J. Dickinson, Peter P. Mayer, Martin Sandler, 2013-11-11 This book is all about improving the health care of elderly people which is facing unprecedented challenges in the 1990s. Energies need to be concentrated in three main areas: the development of high quality care in community settings, the future role of specialized hospital services, and the way that long term care is delivered. All of these are interconnected and success with any of them depends on successful relationships. For example, success in community care requires working interfaces with primary care, the private sector, and hospital care. These interfaces are not static but comprise dynamic interactions between people in different teams with different backgrounds, training, perspectives, and interests. What people do is influenced strongly by the organizations they work for. These inescapable facts lead us to the structure of this book. By concentrating on sectors, people, and organizations, we hope to deal with all the important relationships in a coherent way. Yet this book is not intended to be from a service providers perspective. We have arranged the book in this way so that providers are best equipped to meet the needs of their customers, whether they are patients, residents, or clients. We know that elderly people may experience dislocation in their care because of frictions and gaps between different sectors, disciplines, teams, and organizations. To achieve seamless care, there is a need for greater understanding and harmony of purpose and action across the care spectrum.

Powell, Conference Board, 1995 **Quality Team Learning for Schools** James E. Abbott, 1998. Abbott draws on his personal experiences as a school principal struggling to attain quality reform and he contends that team learning, bringing all schoolpeople like teachers, administrators, and parents together, is relevant. Team learning demands that each person participate through building on the learning of others, processing knowledge, self-discovery, and personal reflection. He also views the dynamic human side of learning as crucial and he says that schoolpeople ought to have ownership of the school.
